

VALU-BEAM[®] "990" Series

Sensors with Built-in Totalizing Counter

VALU-BEAM 990 series sensors boast the same high optical performance offered by the front-line 912-series, and also contain a built-in 6-digit totalizing counter. Sensor models are available for opposed, retroreflective, and convergent beam sensing modes. In addition, there are models for use with both glass and plastic fiberoptics.

A special infrared retroreflective version is available, which is designed for counting people passing through entry ways. It has built-in on/off time delays to minimize the chance of multiple counts.

The "990" series VALU-BEAM's 6-digit LCD counter is reset simply by touching the area of the housing shown with the permanent magnet supplied with the sensor (see dimension drawing, below). Standard models automatically reset to zero upon power-up.

Memory backup option: SMA990 series sensors with internal memory backup for maintaining "count memory" while power is removed are available by special order. These models will "hold" a count for over 100 hours, and are indicated by the model number suffix "MB" (i.e., "SMA990LVMB" is the memory backup version of sensor model SMA990LV). Contact the factory for availability and pricing of these models.

SMA990-series sensors wire directly to either 10 to 250V ac (50/60Hz) or 12 to 115V dc.

SPECIFICATIONS, SMA990 SERIES VALU-BEAM SENSORS

SUPPLY VOLTAGE: 10 to 250V ac, 50/60Hz or 12 to 115V dc at less than 20 milliamps.

SENSOR RESPONSE: 15 milliseconds LIGHT, 15 milliseconds DARK. 100 millisecond delay on power up (no counts are entered during this time). Models with memory backup have no power-up delay. *Note: Some models with memory backup may increment 1 count upon reapplication of power.*

COUNT ENTRY: counts are entered on DARK-to-LIGHT transition.

COUNT RESET: in *standard* models, counter is reset to zero automatically upon applying power to the sensor. All models may be reset by touching the housing on top of the sensor (see below) with a permanent magnet (supplied with sensor).

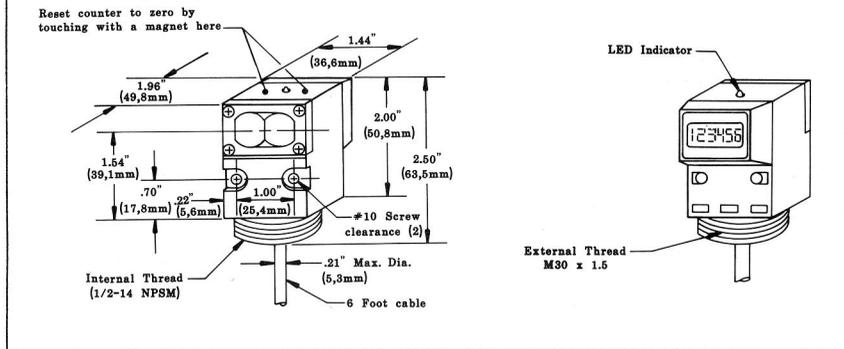

CONSTRUCTION: reinforced black Valox[™] housing, totally encapsulated circuitry, molded o-ring sealed lenses or fiber fittings, stainless steel hardware. Meets NEMA standards 1, 2, 3, 3S, 4, 4X, 12, and 13.

CABLE: 6 feet (2m) of PVC-jacketed 2-conductor cable is standard. Three-pin quick-disconnect ("QD") models are available optionally (one conductor goes unused); see page 4.

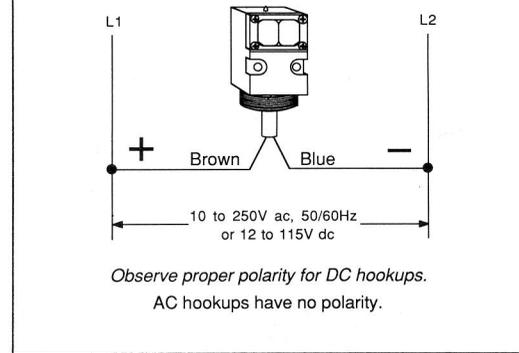

INDICATOR LED: top-mounted red LED indicator lights whenever the sensor "sees" its modulated light source.

OPERATING TEMPERATURE RANGE: 0 to 50 degrees C (32 to 122 degrees F).

HOOKUP DIAGRAM

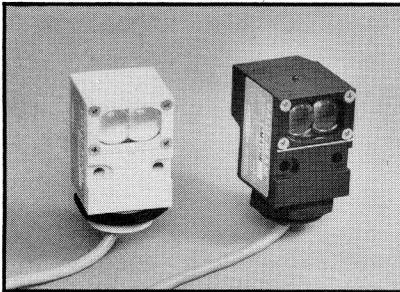

VALU-BEAM "990" Series Sensors

Sensing Mode

Models

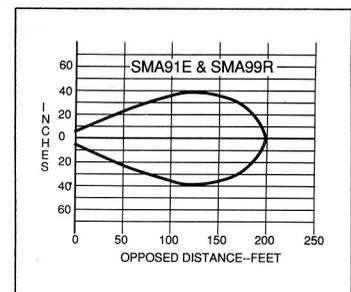

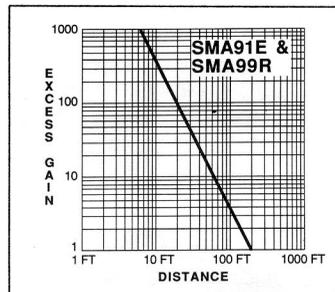

Excess Gain

Beam Pattern

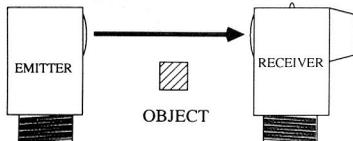

SMA91E & SMA99R

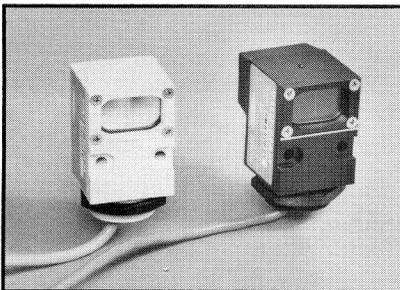

Voltage: 10 to 250V ac or 12 to 115V dc;
("E": 10-250V ac/dc)
Range: 200 feet (60m)
Beam: infrared, 880nm;
visible red tracer beam
Effective beam: 0.5" dia.

OPPOSED MODE

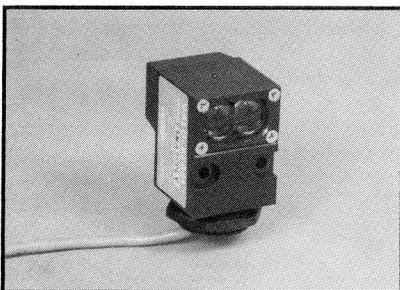

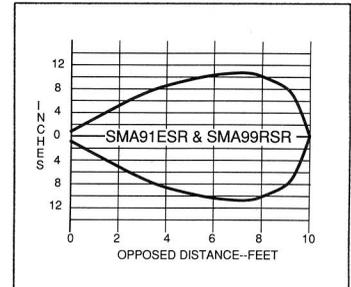

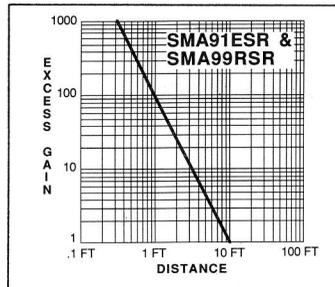

Opposed mode sensors have higher excess gain than other models, and therefore should be used whenever possible. Opposed mode is the most reliable sensing mode for counting opaque materials. The small size of these sensors makes them ideal for many conveyor applications, and their small effective beam size (particularly of the ESR/RSR models) enables them to reliably count relatively small objects. ESR and RSR models also have a wide beam angle for very forgiving alignment within the 10-foot range. VALU-BEAM opposed mode sensors have a visible red "tracer beam" which greatly simplifies sensor alignment.

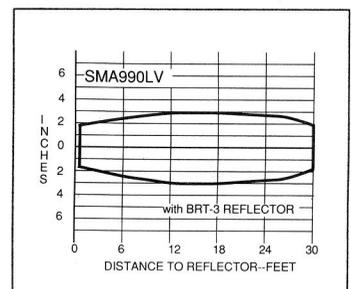

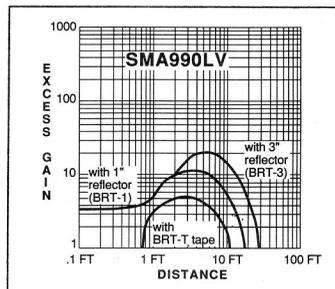

SMA91ESR & SMA99RSR

Voltage: 10 to 250V ac or 12 to 115V dc; ("ESR": 10-250V ac/dc)
Range: 10 feet (3m)
Beam: infrared, 880nm;
visible red tracer beam
Effective beam: .12" dia.

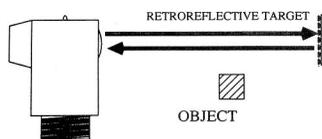

SMA990LV

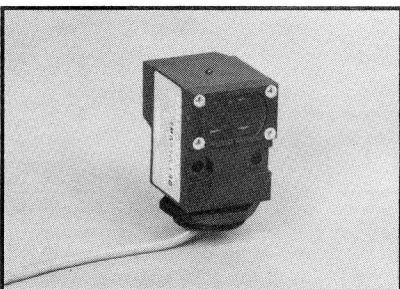

Voltage: 10 to 250V ac or 12 to 115V dc
Range: 6 inches to 30 feet (9m)
Beam: visible red, 650nm

RETROREFLECTIVE MODE

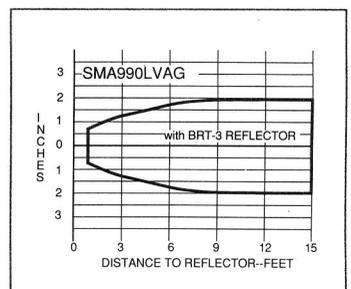

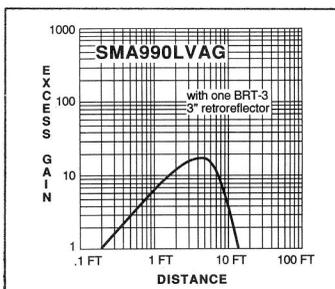

A visible-red light beam reduces the potential for false signals from highly reflective objects ("proxing") and simplifies alignment. The AG (anti-glare) model polarizes the emitted light and filters out unwanted reflections, making its use possible in applications otherwise unsuited to retroreflective sensing (and where reduced excess gain is acceptable). Maximum range with all units is attained when using the model BRT-3 3" corner cube retroreflector. See the Banner catalog for details about available retroreflective materials.

SMA990LVAG

("AG"= anti-glare filter)
Voltage: 10 to 250V ac or 12 to 115V dc
Range: 1 to 15 feet (4.5m)
Beam: visible red, 650nm
(with polarizing filter)

Sensing Mode

Models

Excess Gain

Beam Pattern

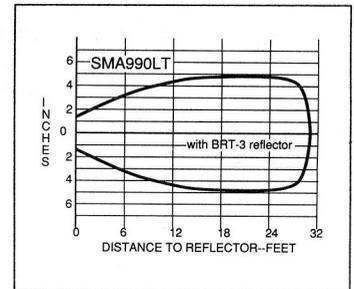

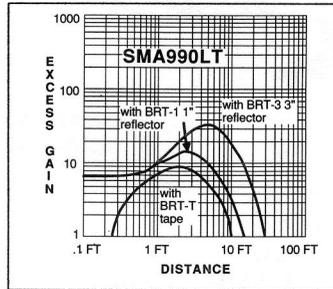

SMA990LT

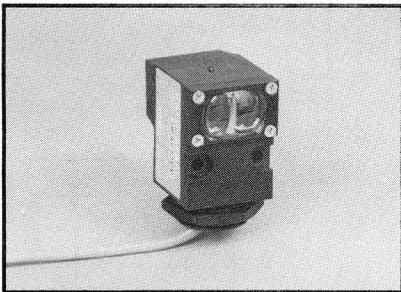

Voltage: 10 to 250V ac
or 12 to 115V dc
Range: 30 feet (9m)
Beam: infrared, 880nm

RETROREFLECTIVE MODE (continued)

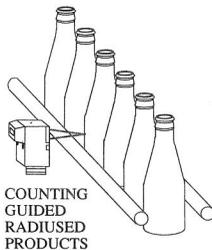

VALU-BEAM model SMA990LT is designed specifically for "people counting". Its strong (30 foot range) infrared beam is invisible to the eye, and a built-in one-tenth second on/off delay helps prevent multiple counts. Maximum retroreflective signal strength is attained when using the model BRT-3 corner-cube retroreflector. Other retroreflective materials may also be used (see the Banner catalog for descriptive information).

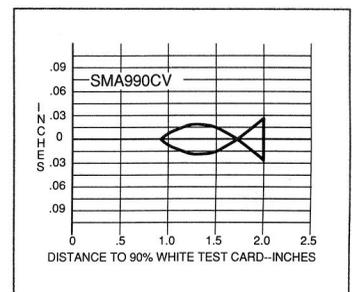

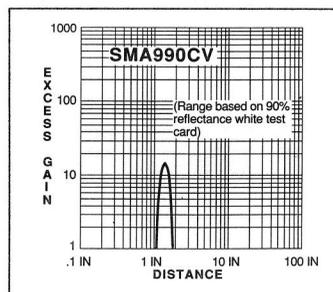

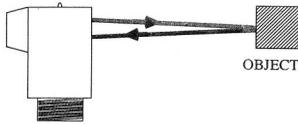

SMA990CV

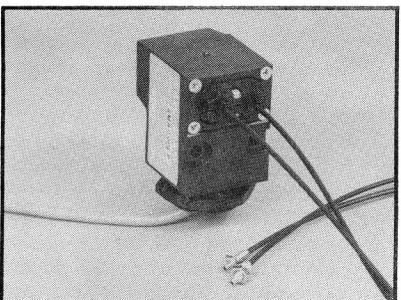

Voltage: 10 to 250V ac
or 12 to 115V dc
Focus at 1.5" (38mm)
Beam: visible red, 650nm

CONVERGENT MODE

VALU-BEAM convergent sensors produce a precise .06" diameter visible red sensing spot at a focus point 1.5" in front of the sensor lens. Due to its very narrow depth of field, this model excels at counting small objects only a fraction of an inch away from backgrounds. This convergent sensor may be used for reliable counting of some radiused products which flow past at a fixed distance from the sensor lens.

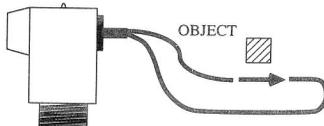

SMA990FP

Voltage: 10 to 250V ac
or 12 to 115V dc
Range: see E.G. curves
Beam: visible red, 650nm

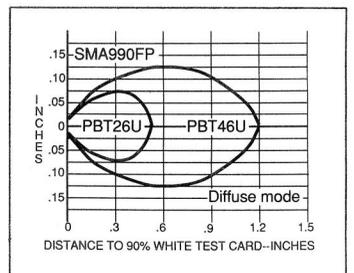

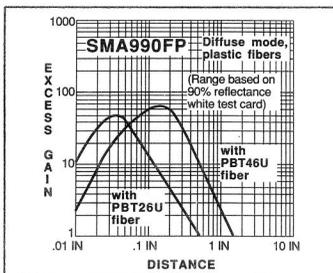

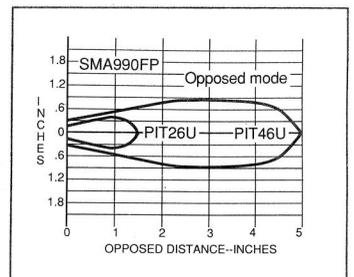

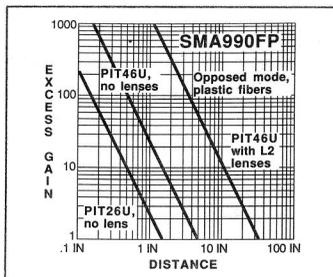

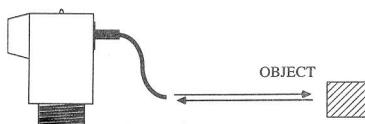

The powerful *modulated visible beam* of this sensor makes it compatible with all Banner *plastic fiberoptic assemblies*. Banner plastic fibers are an economical alternative to glass fibers when environmental conditions allow (see below). Banner plastic fiberoptics are available in two core diameters and with various sensing tip styles. Standard length is 6 feet. More information on plastic fiberoptics may be found in the Banner catalog.

OPPOSED

DIFFUSE

ENVIRONMENTAL FACTORS FOR PLASTIC FIBEROPTICS

OPERATING TEMPERATURE OF FIBEROPTIC ASSEMBLIES: -30 to +70° C (-20 to +158° F).

CHEMICAL RESISTANCE OF FIBEROPTIC ASSEMBLIES: the acrylic core of the monofilament optical fiber will be damaged by contact with acids, strong bases (alkalis), and solvents. The polyethylene jacket will protect the optical fiber from most chemical environments; however, materials may migrate through the jacket with long-term exposure. Samples of plastic fiberoptic material are available from Banner for testing and evaluation.

Beam Pattern

SMA990F

Voltage: 10 to 250V ac
or 12 to 115V dc
Range: see E.G. curves
Beam: infrared, 880nm

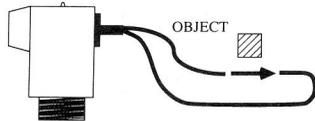

Fiberoptic sensing is often the answer when, due to space or environmental limitations, the sensor itself cannot be placed at the actual sensing position. This sensor's powerful modulated infrared beam is compatible with all Banner glass fiberoptics in the opposed, retroreflective, and diffuse sensing modes. Glass fiberoptic selection information may be found in the Banner catalog. The sensor/fiber interface is waterproof to maintain complete sensing system moisture rejection.

Opposed mode fiberoptic sensing is often employed in parts counting applications. Fiberoptics can be built with sensing ends having windows that conform to the size and profile of the part. This allows most efficient use of the sensor's emitted light energy. Refer to the "Glass Fiberoptics" section of the Banner catalog.

OPTIONS and ACCESSORIES for "990" SERIES SENSORS

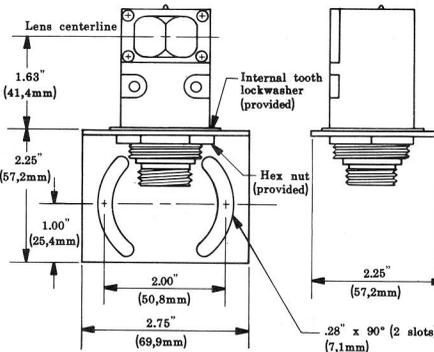

"QD" OPTION

The VALU-BEAM "QD" option allows quick and easy removal or replacement of VALU-BEAM sensors in the field. "QD" option VALU-BEAM "990" series sensors have a 3-pin male connector, built into the sensor's base, which mates with the model MBCC-312 3-conductor female SO-type quick-disconnect cable. To specify the "QD" option on a sensor, simply add the letters "QD" to the end of the sensor's model number. (Example: the QD version of the SMA990FMB is "SMA990FMBQD".) Model MBCC-312 SO-type cable (12' length) must be ordered separately.

DIMENSIONS, "QD" SENSORS

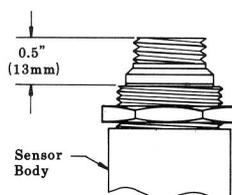

SMB900 ACCESSORY MOUNTING BRACKET

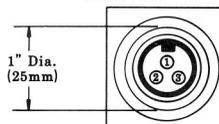

Other VALU-BEAM accessories are available; see Banner catalog.

Accessory mounting bracket model SMB900 has curved mounting slots for versatility in mounting and orientation. The sensor mounts to the bracket by its threaded base, using a jam nut and lock-washer (both included). The bracket accommodates both standard and "QD" sensor models. Bracket material is 11-gauge zinc-plated steel. The curved mounting slots have clearance for 1/4" screws.

3-PIN SENSOR BASE CONFIGURATION

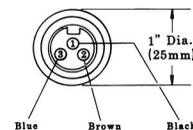

"QD" Receptacle Pin Numbering (Male Pins)

NOTE: Pin #1 is not used.

MBCC-312 CABLE (end view of connector)

For DC applications:
BROWN (pin #2) connects to +Vdc,
BLUE (pin #3) connects to -Vdc.

Banner Engineering Corp Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. **IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.**

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp.
