Datasheet

- Easy-to-use Expert-style Static and Dynamic TEACH options, plus Window, Light, and Dark SET, via push button or remote input
- Smart power-control algorithm to maximize performance in low-contrast applications
- Easy push-button or remote sensor setup options:
  - Dark-Operate/Light-Operate select
  - Selectable 30 ms output OFF-delay
- Less than 1 millisecond output response for excellent sensing repeatability
- Tough ABS housing is rated IEC IP67; NEMA 6
- Bright LED operating status indicators are visible from 360°
- Discrete PNP or NPN output, depending on model
- Multiple connection options available (see Models)
- Compact housing, easy barrel-mount (some models) or side-mount installation

WARNING: Not To Be Used for Personnel Protection

Never use this device as a sensing device for personnel protection. Doing so could lead to serious injury or death. This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition.

The standard 2 m (6.5 ft) cable models are listed. To order the 9 m (30 ft) cable models, add the suffix "W/30" to the cabled model number. For example, QS18EN6FP W/30. Models with a quick disconnect (QD) connector require a mating cable.

To order a model with a 4-pin QD 150 mm (6 in) Euro-style pigtail, add suffix "Q5" (for example, QS18EN6FPQ5).

To order a model with a 4-pin QD 150 mm (6 in) Pico-style pigtail, add suffix "Q" (for example, QS18EN6FPQ).

To order a model with a 4-pin Integral Euro-style QD, add suffix "Q8" (for example, QS18EN6FPQ8).

To order a model with a 4-pin Integral Pico-style QD, add suffix "Q7" (for example, QS18EN6FPQ7).

1 Specified using BRT-84 reflector (sold separately)
Overview of QS18E Expert Series Sensors

The QS18E Expert Sensors family of sensors provides high-performance sensing in a compact package. The sensors feature a discrete output (NPN or PNP, depending on model), two bright LEDs for easy status monitoring during configuration and operation, multiple configuration options, remote configuration, and security lockout options.

1. Amber output LED
2. Green power indicator LED
3. Receiver port
4. Emitter port
5. Configuration button

Wiring Diagrams

Cabled wiring diagrams are shown. Quick disconnect (QD) wiring diagrams are functionally identical.
Sensor Configuration

Configure the sensor using any of five TEACH or Set options (by push button or the remote wire) to define the sensing limits. Use a Setup procedure to enable a 30 ms OFF-delay or to change the Light-/Dark-Operate setting (see Sensor Setup on page 3). Sensing limit configuration options include:

- Static TEACH: one switching threshold, determined by two taught conditions
- Dynamic (on-the-fly) TEACH: one switching threshold, determined by multiple sampled conditions
- Light Set and Dark Set: one switching threshold, offset from a single sensing condition (the “dark” condition or the “light” condition; see Figure)
- Window Set: a sensing window, centered around a single sensing condition

The sensor’s output is disabled during all TEACH and Set procedures, and is enabled upon return to Run mode.

Following any TEACH or Set procedure other than Static TEACH, the Output ON condition (Light- or Dark-Operate setting) remains as it was last configured. To change that setting or the OFF-delay setting, see Sensor Setup on page 3.

Remote Configuration

Use the remote function to configure the sensor remotely or to disable the push button for security. Connect the white wire of the sensor to ground (0V dc), through a remote programming switch. Pulse the remote line according to the diagrams in the configuration procedures. The length of the individual programming pulses is equal to the value T: 0.04 seconds ≤ T ≤ 0.8 seconds

Push Button Enable/Disable

The remote input may be used to disable the sensor push button to prevent unauthorized adjustment. Connect the white wire of the sensor as described above to perform the procedure below to either enable or disable the feature.

<table>
<thead>
<tr>
<th>Push Button Enable/Disable</th>
<th>Remote Line (0.04 seconds ≤ T ≤ 0.8 seconds)</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not available</td>
<td>From Run mode, four-pulse the remote line.</td>
<td>Sensor toggles between enable/disable settings and returns to RUN mode. Power LED: Flashes 3x, then ON Green Output LED: OFF, then ON or OFF, depending on output state</td>
</tr>
</tbody>
</table>

Returning to RUN Mode without Saving Settings

Exit Static TEACH and Set modes after the automatic 60-second time-out or by manually exiting the process. To manual exit, press and hold the push button (or hold the remote line low) for 2 seconds. The sensor returns to Run mode without saving any new settings.

Sensor Setup

Access setup functions directly from Run mode using the following procedures.

30 ms OFF-Delay (Pulse Stretcher) Enable/Disable

<table>
<thead>
<tr>
<th>Push Button (0.04 seconds ≤ “Click” ≤ 0.8 seconds)</th>
<th>Remote Line (0.04 seconds ≤ T ≤ 0.8 seconds)</th>
<th>Results</th>
</tr>
</thead>
<tbody>
<tr>
<td>From Run mode, six-click the push button.</td>
<td>From Run mode, six-pulse remote line.</td>
<td>Sensor toggles between enable/disable settings and returns to RUN mode. Power LED: Flashes 3x, then ON Green Output LED: Enabled – ON, Disabled – OFF, Then ON or OFF, depending on output state</td>
</tr>
</tbody>
</table>

2 Initial output LED condition is simultaneous with Power LED 3-flash

3 Initial Output LED condition is simultaneous with Power LED 3-flash.
Light-Operate/Dark-Operate Select

<table>
<thead>
<tr>
<th>Push Button (0.04 seconds ≤ “Click” ≤ 0.8 seconds)</th>

</tr>
<tr>
<td></td>
<td></td>
<td>Then ON or OFF, depending on output state</td>
</tr>
</tbody>
</table>

Static TEACH

- Static TEACH locates a single switching threshold (switchpoint) at the optimal location between the two taught conditions, with the Output ON condition on one side, and the Output OFF condition on the other.
- During Static TEACH, the first condition taught is the ON condition. Output ON and OFF conditions may be reversed by switching the TEACH order or by changing the Light-/Dark-Operate setting in setup mode (see Sensor Setup on page 3).
- Static TEACH is recommended for applications where two conditions can be presented individually.

Dynamic TEACH

- Dynamic TEACH sets a single switching threshold (switchpoint).
- Dynamic TEACH is used to teach during actual sensing conditions, taking multiple samples of the light and dark conditions and automatically setting the threshold at the optimum level.
- The Output ON state (Light- or Dark-Operate setting) remains as it was last configured. To change the Light-/Dark-Operate setting, see Sensor Setup on page 3.
- Dynamic TEACH is recommended for applications where a machine or process may not be stopped for teaching.

**Figure 4. Dynamic TEACH (Light Operate shown)**

</tbody>
</table>

The initial output LED indicator condition is simultaneous with the power LED indicator 3-flush
Light Set

- Light Set sets a threshold approximately 12.5% below the presented sensing condition.
- Any condition darker than the threshold causes the output to change state.
- In Light-Operate mode, the presented condition is the Output ON condition. In Dark-Operate mode, the presented condition is the Output OFF condition. To change the Light-/Dark-Operate setting, see Sensor Setup on page 3.
- Light Set is recommended for applications where only one condition is known, for example a stable light background with varying darker targets, or in retroreflective applications.

\[ \text{Figure 5. Light Set (Light Operate shown)} \]

1. Access the Light Set mode.

<table>
<thead>
<tr>
<th>Method</th>
<th>Action</th>
<th>Result</th>

<tr>
<td>Remote Line</td>
<td>Present the sensing condition, then four-pulse the remote line.</td>
<td>The sensor returns to Run mode with the new settings. TEACH Not Accepted. Power LED Indicator: OFF. Output LED Indicator: Slow flash (1 Hz).</td>
</tr>
</tbody>
</table>

Dark Set

- Dark Set sets a threshold approximately 12.5% above the presented sensing condition.
- Any condition lighter than the threshold causes the output to change state.
- In Light-Operate mode, the presented condition is the Output OFF condition. In Dark-Operate mode, the presented condition is the Output ON condition. To change the Light-/Dark-Operate setting, see Sensor Setup on page 3.
- Dark Set is recommended for applications where only one condition is known, for example a stable dark background with varying lighter targets, or when maximum excess gain is required.

\[ \text{Figure 6. Dark Set (Light Operate shown)} \]

1. Access the Dark Set mode.

<table>
<thead>
<tr>
<th>Method</th>
<th>Action</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Push Button</td>
<td>Press and hold the push button 2 to 4 seconds.</td>
<td>The sensor waits for the sensing condition. Power LED Indicator: OFF. Output LED Indicator: Slow flash (1 Hz)</td>
</tr>
</tbody>
</table>

\[ The initial output LED indicator condition is simultaneous with the power LED indicator 3-flash. \]
## Window Set

![Window Set Diagram](image)

- In Window Set, the single ON condition window extends approximately 12.5% above and below the presented condition when Light Operate is selected. Output ON and OFF conditions may be reversed by changing the Light-/Dark-Operate setting (see Sensor Setup on page 3).
- Lighter or darker conditions outside of the window cause the output to change state.
- Window Set is recommended for applications where the target to be sensed may not always appear in the same place, or when other unwanted signals may appear.

![Figure 7. Window Set (Light Operate shown)](image)

6 The initial output LED indicator condition is simultaneous with the power LED indicator 3-flash.
7 The initial output LED indicator condition is simultaneous with the power LED indicator 3-flash.
Specifications

Supply Voltage
10 to 30 V dc (10% maximum ripple) at less than 35 mA, exclusive of load; 10 to 24 V dc at > 55°C

Supply Protection Circuitry
Protected against reverse polarity and transient voltages

Output Configuration
Current sourcing (PNP) or current sinking (NPN), depending on model; Light- or dark-operate selectable; Selectable 30 ms output OFF-delay

Rating:
100 mA max

Off-state leakage current:
less than 50 µA at 30 V dc (see Application Note 1)

ON-state saturation voltage:
less than 1.5 V at 100 mA (1.7V for 30 ft cable models)

Output Protection Circuitry
Protected against false pulse on power-up and continuous overload or short-circuit of output

Output Response
Note: Momentary delay on power-up; output does not conduct during this time 600 µs ON/OFF

Repeatability
75 µs

Construction
ABS housing, PMMA lens

Connections
PVC-jacketed 4-conductor 2 m (6.5 ft) or 9 m (30 ft) unterminated cable, or 4-pin Euro-style or 4-pin Pico-style quick-disconnect (QD), either integral or 150 mm (6 in) pigtail, are available. QD cordsets are ordered separately.

Operating Conditions
Temperature: −20 °C to +70 °C (−4 °F to +158 °F)
Relative Humidity: 95% at +50 °C maximum relative humidity (non-condensing)

Application Notes
If the push button does not appear to be responsive, perform the push button enable procedure. To maintain backwards compatibility with earlier models, 3 remote line pulses or a push button hold followed by 3 push button clicks will perform a Dark SET.

Certifications

Warning: Electrical connections must be made by qualified personnel in accordance with local and national electrical codes and regulations.

Overcurrent protection is required to be provided by end product application per the supplied table. Overcurrent protection may be provided with external fusing or via Current Limiting, Class 2 Power Supply.

Required Overcurrent Protection

Supply Wiring (AWG) Required Overcurrent Protection (Amps)

### SMBQS18DIN
- Right-angle bracket assembly for mounting on 35 mm DIN rail
  - 300 series stainless steel and glass filled nylon; zinc-plated screws

  ![Diagram of SMBQS18DIN](image22.png)
**SMBQS18Y**
- Die-cast bracket for 18 mm holes
- Includes metal hex nut and lock washer
- Allows ± 8° for cabled sensors

**Hole size:**
- A = ø 15.3

**SMB18A**
- Right-angle mounting bracket with a curved slot for versatile orientation
- 12-ga. stainless steel
- 18 mm sensor mounting hole
- Clearance for M4 (#8) hardware

**Hole center spacing:**
- A to B = 24.2
- **Hole size:**
  - A = ø 4.6, B = 17.0 × 4.6, C = ø 18.5

**SMB4050YL**
- Heavy-duty die-cast bracket for industrial protection
- Replaceable window for use with some sensor models
- M18 vertical mounting option
- Nut and lock washer included

**Hole size:**
- A = ø 15.3

**SMB3018SC**
- 18 mm swivel side or barrel-mount bracket
- Black reinforced thermoplastic polyester
- Stainless steel swivel locking hardware included

**Hole center spacing:**
- A = 50.8
- **Hole size:**
  - A = ø 7.0, B = ø 18.0

Additional available brackets: SMB46A, SMB18SF, SMBQS18RA, SMB18FA, SMBQS18A

For a list of reflectors or fiber optic assemblies, refer to the Accessories section of your current Banner Sensors catalog or visit www.bannerengineering.com for complete information.

**Banner Engineering Corp. Limited Warranty**

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

**THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.**

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXCLUDED COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp. Any misuse, abuse, or improper application or installation of this product or use of the product for personal protection applications when the product is identified as not intended for such purposes will void the product warranty. Any modifications to this product without prior express approval by Banner Engineering Corp. will void the product warranties. All specifications published in this document are subject to change. Banner reserves the right to modify product specifications or update documentation at any time. Specifications and product information in English supersede that which is provided in any other language.

For the most recent version of any documentation, refer to www.bannerengineering.com.
