Banner’s WLB32 is an ultra-bright LED fixture that features an even light output for a no glare ‘glow’. Suitable for a variety of environments and applications, including work stations, machine lighting, control cabinets, and manufacturing lines, the WLB32 uses advanced LED lighting technology to provide a high-quality and maintenance free industrial lighting solution for years.

- Highly energy efficient for overall cost savings
- High/Low/Off switch
- Models with eye shield block side glare
- Daisy chain power to multiple lights
- Motion detection models available
- Metal housing, shatterproof window
- Easy installation with snap clips, or a choice of magnetic or angle brackets

WLB32 Industrial LED Light Bars are available as cascadable models that can be “daisy-chained” together for a continuous length of lighting, with a minimum of wiring. Each light bar can be turned to high, low, or off independently of the other lights, upstream or downstream, in the chain. A double-ended accessory cordset must be used between each pair of cascading lights.

The listed models include a U.S. power cable.

- To order model with no power cable, omit the suffix "B" from the model number. For example, WLB32ZC285PBQM. For a list of other countries’ wall plug cables, refer to the Accessories list.
- To order the light without the integral switch, omit the “PB” from the model number. For example, WLB32ZC285QMB.
- To order the light with the integral motion detector, replace the ‘PB’ from the model number with ‘M’. For example, WLB32ZC285MQMB.
- To order the light with the eye shield, add an ‘E’ after the length. For example, WLB32ZC285EPBQMB.

**Important:** Lea el siguiente instructivo antes de operar el luminario. Por favor descargue desde www.bannerengineering.com toda la documentación técnica de los WLB32 Industrial LED Light Bar (AC), disponibles en múltiples idiomas, para detalles del uso adecuado, aplicaciones, advertencias, y las instrucciones de instalación de estos dispositivos.

**Important:** Lisez les instructions suivantes avant d’utiliser le luminaire. Veuillez télécharger la documentation technique complète des WLB32 Industrial LED Light Bar (AC) sur notre site www.bannerengineering.com pour les détails sur leur utilisation correcte, les applications, les notes de sécurité et les instructions de montage.
Installing the WLB32 AC Series Lights

1. Attach the snap brackets to the light.
2. Select a suitable horizontal or vertical dry mounting location.
3. Place the light in the mounting location and mark the positions of the snap bracket mounting holes.
4. Drill the holes and use appropriate screws to secure the snap bracket to the mounting location.
5. Snap the light onto the brackets.
6. When daisy chaining multiple lights, follow steps 1 through 5 to mount additional lights. See the application note in the Specifications for the maximum allowed lights daisy chained together and maximum allowed cable run when choosing mounting locations.
7. Connect the daisy chained units together using cascade cordsets (see Accessories).
8. Install the supplied cascade cover over the output connector on the last light in the chain.
9. Plug the power cord from the first light into the wall outlet.

CAUTION: To reduce the risk of fire, electric shock, or injury to personnel:
- Use only insulated staples or plastic ties to secure cords;
- Route and secure cords so that they will not be pinched or damaged when the cabinet is pushed to the wall;
- Position the portable cabinet light with respect to the cabinet so the lamp replacement markings are able to be read during relamping;
- Do not recess into ceilings or soffits; and
- Do not conceal the cords. The National Electrical Code (NEC) does not permit cords to be concealed where damage to insulation may go unnoticed. To prevent fire danger, do not run cord behind walls, ceilings, soffits, or cabinets where it may be inaccessible for examination. Cords should be visually examined periodically and immediately replaced when any damage is noted.

Specifications

Operating Voltage
90 to 264 V ac (50 or 60 Hz)
Power factor > 0.95 on high setting at 120 V ac
See electrical characteristics on product label

Supply Protection Circuitry
Protected against transient voltages

Light Characteristics
Color: Daylight white
Color temperature (CCT): 5000K (±300K)
Lumen output: 750 (±5%) per foot, typical at 25 °C (77 °F)
CRI: 85 typical
Eye shield reduces lumens by approximately 25%

LED Lifetime
Lumen Maintenance - L70
When operating within specifications, output will decrease less than 30% after 50,000 hours.

Push Button
II = 100% light intensity
I = 50% light intensity
O = Standby

Models with Motion Detection
Light turns off after approximately 60 seconds without detecting motion.
Range: 12 m; ±45° field of view
Standby current: 170 µA

Construction
Anodized aluminum housing; polycarbonate window and end caps; stainless steel mounting brackets

Spacing Criterion
Vertical: 1.22
Horizontal: 1.32

Mounting
Snap clips; optional magnetic mount or swivel bracket accessories available

Connections
Integral custom QD (connecting cordset required)

Environmental Rating
IEC IP50

Vibration and Mechanical Shock
Vibration 10-55 Hz 1.0 mm p-p amplitude per IEC60068-2-6
Shock 15G 11 ms duration, half sine wave per IEC60068-2-27

Operating Temperature
–25 °C to +45 °C (–13 °F to 113 °F)
Models with Motion Detection: –20 °C to +45 °C (–4 °F to +113 °F)

Storage Temperature
–40 °C to +70 °C (–40 °F to +158 °F)

Test Data
LM-79, LM-80, TM-21

Certifications
UL Listed only for 120 V ac, 60 Hz
UL Recognized for easy installation in control cabinets

Application Note
When connecting cascadable lights in series, do not exceed the maximum unit limit of 10, regardless of light size, and do not exceed a maximum wiring distance of 100 m (328 ft)

Spacing Criteria (SC)
The spacing criteria is the fixture-spacing-to-mounting-height ratio and aids in laying out a pattern of fixtures. Multiply the spacing criteria by the mounting height to get the maximum fixture spacing that still provides even illumination (no shadowing between fixtures).

Luminaire Spacing = SC × Height to Illuminated Plane
The mounting height is the distance from the fixture to the surface you are lighting.

### Enclosure Accessories

#### LMBEDS Switch
- Bracket with plunger switch to power lights when the enclosure is opened
- Refer to datasheet 160672 for more information

### Mounting Brackets

#### LMBWL32
- Replaces the bracket that ships with the WLB32 light
- Stainless steel
- Includes 4 snap clips, 4 screws, and 2 insulator caps

#### LMBWL32-180S
- Swivel bracket kit allows 180° of movement
Mounting Brackets

**LMBWLB32MAG**
- Magnetic mounting bracket for easy attachment to steel and iron surfaces

**LMBWLB32U**
- Die cast bracket for rugged applications
- Secured to light with included thumb screw
- Clearance hole for 6 mm (1/4 in) button head screw

**LMBWLB32UT**
- Die cast bracket for rugged applications
- Secured to light with included thumb screw
- Integral 1/4-20 stud for mounting

Banner Engineering Corp. Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

**FCC Part 15 and CAN ICES-3 (B)/NMB-3(B)**

This device complies with part 15 of the FCC Rules and CAN ICES-3 (B)/NMB-3(B). Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules and CAN ICES-3 (B)/NMB-3(B). These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the manufacturer.
