# PTL110 Series

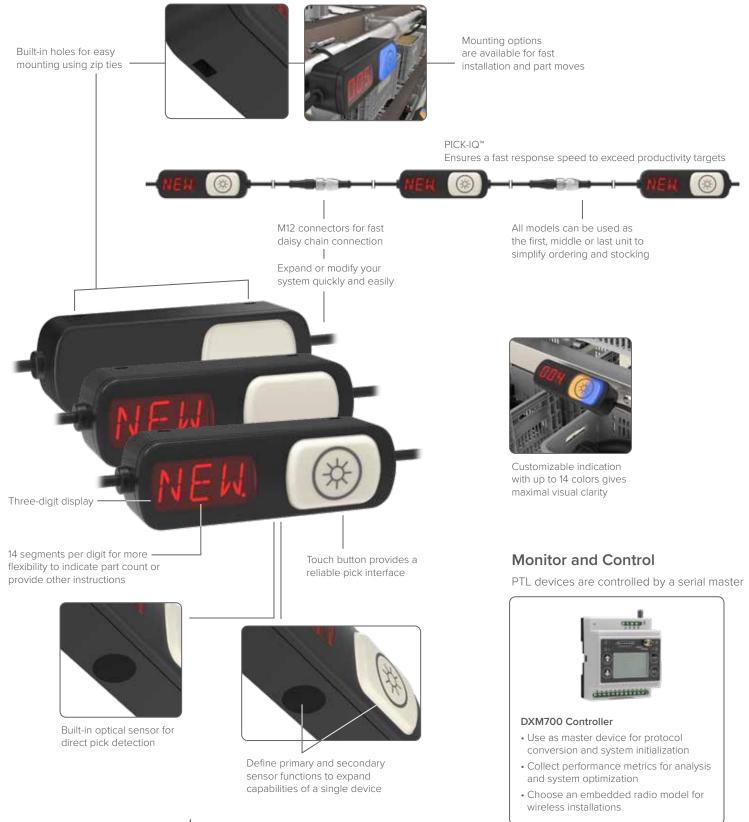

## Scalable, Versatile Pick-to-Light Solution

- Optimize application performance with options including optical sensor, touch button and display
- Reduce system costs with simple mounting and direct device connection
- Achieve fast picking speeds in large scale systems with PICK-IQ™ serial communication

# Improve Productivity and Quality in Picking, Kitting and Related Applications

Bright indicator provides guidance and sensors confirm actions.

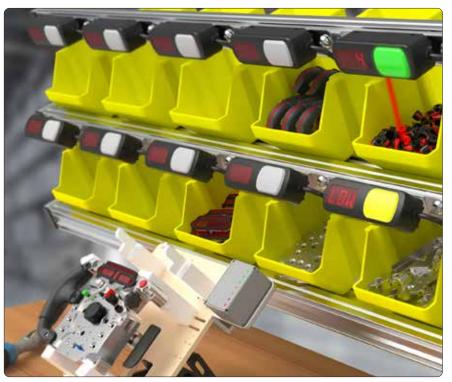

#### Kitting Station

#### Challenge

- Assure accuracy and increase speed at kitting stations yet keep the system simple enough for one operator to perform multiple tasks
- Kitting areas have numerous parts to satisfy material demand for multiple models, and need flexibility for modification and expansion

#### Solution

- A single operator can use the multicolor indicator, clear three-digit display, and sensor or touch button to fulfill kits for multiple assemblies. The versatile PTL system can be configured for almost any type of kitting application large or small.
- High speed PICK-IQ™ communication allows for large, scalable kitting stations that guide the operator to maintain a pace that exceeds productivity targets
- Simple electrical and mechanical installation options simplify the addition of extra pick points to the system

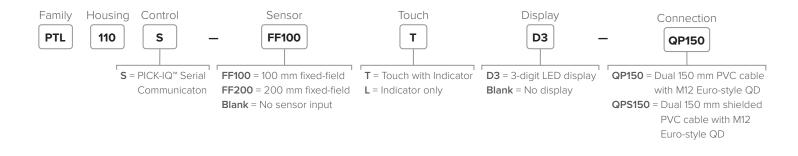

#### Multiproduct Assembly Station

#### Challenge

- Eliminate errors and ensure quality when multiple parts are built at one station
- Increase throughput and simplify training and restocking processes

#### Solution

- Clear indication quickly identifies the correct component and quantity for each step and reduces assembly errors.
  Component count can be monitored remotely, simplifying restocking and avoiding downtime.
- The optical sensor detects a hand during normal work motion and PICK-IQ™ communication provides fast response time to quickly indicate the next bin
- Color-based assembly makes training fast and easy. Simple connectivity and brackets allow PTL devices to be moved without reprogramming or tools.

Specifications -

**Supply Voltage** 10 to 30 V DC; 1.35 Watts max. power draw

**Communication** PICK-IQ™ is compatible with Modbus RS-485

DXM700 converts Modbus RTU to Modbus TCP/IP or Ethernet/IP

**Connected Devices** 64 or more under standard usage with a single power supply

>200 possible depending on power supply, cable length and

device usage

**Construction** Housing: ABS

Indicator: Polycarbonate Display Lens: Acrylic (if present)

Environmental Rating IP54

Operating Temperature | -40 to +50 °C

90% at +50 °C maximum relative humidity (non-condensing)

Certifications (

#### Accessories

LMBPTL110C

For 28 mm tubular racking

LMBPTL110F

L110F LMBPTL110A45

For slotted extrusion and flat rail mounting

#### 4-Pin M12

Straight connector models listed; for right-angle models, add RA to the end of model number (example, MQDC-406RA)

**5-Pin M12 Shielded** Straight connector models listed

MQDC-406 2 m (6.5') MQDC-415 5 m (15') MQDC-430 9 m (30')

MQDC-STP-506 2 m (6.5') MQDC-STP-515 5 m (15') MQDC-STP-530 9 m (30')

### 4-Pin Double-Ended

Male straight connector to female straight connector

0.3 m (1') MQDEC-403SS 0.91 m (3') MQDEC-406SS 2 m (6.5') MQDEC-412SS 3.7 m (12')

MQDEC-401SS

#### 4-Pin Double-Ended

Male straight connector to male straight connector

**MQDEC-STP-501SS-MM** 0.3 m (1')

#### 4-Pin Double-Ended

Female straight connector to female straight connector

**MQDEC-STP-501SS-FF** 0.3 m (1')
