

Creating & Maintaining a Clean Work Area

Easy-to-implement solution for establishing a rigorous cleaning program

Clean workstations are essential to creating a safe and healthy work environment. For many companies, establishing and maintaining a rigorous cleaning and sanitizing schedule without disrupting productivity can be a challenge.

Make cleaning at regular intervals an integral part of your processes and workflow with Banner's clean workstation monitoring solution. This automated, easy-to-implement solution offers:

- Quick, easy installation with no intrusive alterations to workstations or area infrastructure
- Bright, high-visibility indicators notify staff to begin scheduled cleaning procedure
- Two-way communication enables verified completion of scheduled cleaning events
- Collected data can be used for reporting and to ensure compliance
- Rugged, industrial build resists impact and aggressive cleaning procedures
