Micro-Screen™ and Mini-Screen™

- Micro-Screen™: tough and ultra-compact light screens designed for use on production machinery where space is limited
- Mini-Screen™: rugged and compact light screens suitable for heavy-duty machine guarding applications
- Each system includes emitter(s), receiver(s), controller and interconnecting cables
- Controllers feature (depending on model): Trip or Latch outputs, Floating or Fixed Blanking, Muting, Auto Power-Up, E-Stop input, 2 or 4 safety output contacts, External Device Monitoring
- Highly immune to EMI, RFI, ambient light, weld flash and strobe light

Stylishly designed with your safety in mind!

Mini-Screen™ Safety System ▼

- Compact light screen, 38 x 38 mm, rugged IP65 housing
- 9 m range with 19,1 mm resolution, 18 m range with 25,4 mm resolution and 38 mm resolution for heavy duty models
- Dual controllers accept 2 E/R pairs for guarding 2 entry points at the same machine

Micro-Screen™ Safety System ▲

- Ultra-compact light screen, only 25 x 32 mm, rugged IP65 housing
- 9 m range for array lengths up to 1,2 m; 6 m range for array lengths from 1,4 m to 1,8 m
- Standard series have 19,1 mm resolution, V-series have 31,8 mm resolution

TURCK BANNER Ltd.:

Sensors and equipment for industrial control and automation:

- Inductive, magnet-inductive, photoelectric, ultrasonic, capacitive, pressure and flow sensors
- Ex interfaces
- Bus systems
- Temperature controls
- Cables and cordsets
- Safety systems
- Laser measurement and inspection devices
