(not included)

PSW-24-1
(not included)

Features

- 4-digit, 7-segment LED display
- Two independent touch areas
- Excellent immunity to false triggering by water spray, oils, and other foreign materials
- Rated IP67 and IP69K per DIN 40050-9
- Can be actuated with bare hands or gloves
- IO-Link® and PICK-IQ™ give full access to color, flashing, rotating, display, and dimming settings, as well as advanced animations such as dynamic sequence mode and LED control
- Output settings, including on and off delays, output function, and output state are also available with IO-Link or PICK-IQ

K50 Pro Touch Display Demo Sequence

Option 1: Connect the PSW-24-1 power supply to the K50 Pro Touch Display; it will automatically begin displaying demo functions.

Option 2: Connect the K50 Pro Touch Display to the actuators side of a DBRQ Rechargeable Power Supply.

STEP 1
Connect here

DBRQ (not included)

STEP 2
Use the up or down arrow to increase or decrease the number on the display

STEP 3
Touch the top and the bottom of the device at the same time to transition to a new mode

STEP 4
Use the up and the down arrow to scroll through messages on the display

*The device will transition between demo functions any time the top and bottom arrows are touched at the same time
