

the photoelectric specialist

Shown below is a dimension drawing of the RS8 socket kit (RS8K).

This kit is used for mounting the RS8 socket to a printed circuit board. Included with this kit are the socket, 8 individual socket pins and a nylon screw.

The drill size for the sockets pins is #50 (.070").

The hole size for the nylon screw is .120".

Rev. A Corrected drill size to .070" 12/3/87
