**Datasheet**

*Watertight (IP67) mount for direct-mount or pipe-mount sensors or indicators with a 30 mm threaded base*

To view or download the latest technical information about this product, including specifications, dimensions, accessories, and wiring, see [http://www.bannerengineering.com](http://www.bannerengineering.com).

**Key**

1 = Right-angle bracket base  
2 = Base gasket  
3 = Base gasket wiring access port  
4 = 8-32 set screw  
5 = (3) o-rings  
6 = (3) 5 mm button-head screws (requires M3 Allen wrench, user-supplied)  
7 = 30 mm round gasket  
8 = 30 mm adapter  
9 = (1) 30 mm o-ring  
10 = Sensor or light to be mounted, M30 × 1.5 thread  
11 = M5 hex nut  
12 = M5 external tooth lock washer

**Installation Instructions**

To achieve an IP67 installation, assemble the bracket and light components as shown.

1. Using the base gasket as a template, mark drill holes (5.5 mm) in the mounting surface for the three screw holes and one (12.7 mm) for the wiring to extend through the surface, as needed.
2. Holding the bracket base and gasket firmly against the mounting surface, insert an o-ring on each M5 screw and fasten using the washers and nuts supplied with the bracket.
3. Insert the 30 mm gasket onto the light/sensor threaded base.
4. Screw the 30 mm adapter onto the light/sensor base (hand-tight), in the orientation as shown in the exploded drawing.
5. Verify the o-ring is in place on the adapter, as shown in the exploded drawing.
**Additional Steps for Direct-Mount Applications**

1. Route the cable or QD cordset through the bracket. If sensor/indicator has a QD fitting, attach the cordset fitting firmly to the sensor/indicator connector.
2. Rotate the light (or sensor) relative to the base until the correct orientation is achieved; press the light and adapter into the base. (If rotating the light after it is in the base, turn it only in a clockwise direction.)
3. Tighten the set screw to 0.17 Nm (1.5 in-lbf) max. torque, using the supplied M3 Allen wrench.

**Key**

1 = Right-angle bracket base  
2 = Base gasket  
3 = Base gasket wiring access port  
4 = 8-32 set screw  
5 = (3) o-rings  
6 = (3) 5 mm button-head screws (requires M3 Allen wrench, user-supplied)  
9 = (1) 30 mm o-ring  
11 = M5 hex nut  
12 = M5 external tooth lock washer  
13 = Pipe adapter  
14 = SOP-E... Stand-off pipe (optional)  
15 = SA-M30TE12 stand-off pipe (optional)

**Additional Steps for Pipe-Mount Applications**

1. Use a pipe sealant to seal the pipe end adapter, if a watertight connection is needed.
2. Insert the pipe adapter firmly into the base.
3. Position the threaded pipe end into the adapter and screw snugly.
4. Attach the SA-M30TE12 stand-off pipe adapter to the pipe, screw snugly.
5. Route the cable or QD cordset through the bracket, pipe, and adapters. If sensor/indicator has a QD fitting, attach the cordset fitting firmly to the sensor/indicator connector.
6. Attach the sensor/indicator to the SA-M30TE12 stand-off pipe adapter. Rotate the light (or sensor) relative to the base until the correct orientation is achieved; press the light and adapter into the base.
## Pipe Model

### SOP-E12-150SS
- Elevated-use stand-off pipe (½ inch NPSM/DN15),
- ½ NPT thread at both ends
- Compatible with most industrial environments
150 mm (6 in) long
Polished 304 stainless steel

### SOP-E12-150A
Black anodized aluminum

### SOP-E12-150AC
Clear anodized aluminum

### SOP-E12-300SS
300 mm (12 in) long
Polished 304 stainless steel

### SOP-E12-300A
Black anodized aluminum

### SOP-E12-300AC
Clear anodized aluminum

### SA-M30TE12
- Streamlined stand-off pipe adapter/cover
- Connects between 30 mm light base and ½ inch NPSM/DN15 pipe
- Mounting hardware included
Black acetal

### SA-M30TE12C
White UHMW
