Datasheet

The DXM1200-B1 Wireless Controller is an industrial wireless controller that facilitates Industrial Internet of Things (IIoT) applications. As a communications gateway, it interfaces local serial ports, local I/O ports, and local ISM radio devices to the Internet using a cellular connection or wired Ethernet network connection.

- **High Performance Wireless Communication**—Uses Sure Cross® DX80 Wireless Gateway or MultiHop radio with 900 MHz or 2.4 GHz ISM bands available for long range communication using an internal antenna or an optional external antenna (E housing models)
- **Flexible and Customizable**—Expanded internal logic controller with action rules and ScriptBasic programming capable of developing simple or complex solutions to process, log, and control data to/from multiple wireless radios and sensors
- **Easy Installation in all Environments**—IP67 housing makes installation in any location simpler by eliminating the need for a control cabinet
- **Improved Speed and Memory**—Upgraded internal processor to use 2850 32-bit integer registers, 2000 floating-point registers, and 1050 non-volatile 32-bit integer registers; expanded ScriptBasic programming capability for faster script processing and ability to build more complex solutions with scripts

### Models

### Cellular Communications

Controllers accept Banner Cellular Modems only. Adding a cellular modem requires the placement of an internal cellular antenna. Cellular modems are ordered separately as accessories under the following part numbers:

- LTE CAT1 Verizon (United States only): **SXI-LTE-001**
- LTE CAT-M1 AT&T (North America only): **SXI-CATM1ATT-001**
- LTE CAT-M1 Verizon (North America only): **SXI-CATM1VZW-001**

For more information, refer to the technical note Activating a Cellular Modem (p/n 205026).

Connectivity—The DXM1200-B1's wired and wireless connectivity options make it easy to share data between local and remote equipment. The cellular modem option eliminates the need for IT infrastructures to connect remote equipment for sensing and control to IIoT cloud services. The integrated Sure Cross® wireless radio enables Modbus connectivity to remote sensors, indicators, and control equipment. Connect directly to any PLC and/or SCADA system for easy integration into existing control or monitoring systems. Banner Industrial Wireless radios have two types of networks that can be used for creating applications and solving problems.

Wired Connectivity
- Ethernet: Modbus/TCP (master/slave) or Ethernet/IP
- Field Bus: Modbus RS-485 Master

Wireless Connectivity
- Sure Cross Wireless Radio: DX80 900 MHz, DX80 2.4 GHz, MultiHop 900 MHz, or MultiHop 2.4 GHz
- Cellular modem: LTE (United States only) or GSM (Outside the United States), CATM1-ATT (North America Only) or CATM1-VZW (US Only)

Wireless Radio Networks

Performance Wireless Radio Network
- Star topology (point to point between Gateway and Node radios)
- Battery-powered Node applications are more efficient in a star topology
- Six inputs and six outputs maximum per radio

MultiHop Wireless Radio Network
- Tree topology between one master radio and many repeater and/or slave radios
- Repeater radios add effectively unlimited radio network range
- Full Modbus sensor register data collection as well as typical local I/O like discrete, analog, etc.

Logic Controller—Program the DXM1200-B1's logic controller using action rules and/or ScriptBasic language, which can execute concurrently. The control functions allow freedom when creating custom sensing and control sequences. The logic controller supports the Modbus protocol standards for data management, ensuring seamless integration with existing automation systems. File and LCD password protection is an option.
Register Mapping
Cyclical Read rules from wireless devices or local wired Modbus devices that include optional scaling, error conditions, and the ability to activate a read rule.
Cyclical or Change of State Write rules to wireless devices or local wired Modbus devices with scaling.
Modbus/TCP Master Read or Write rules for external devices on the network.

Action Rules
Thresholds (IF/THEN/ELSE) with timers, minimum on/off time, and logging options.
Math/Logic Rules (arithmetic and bitwise operators).
Control Logic (logical operators and SR/T/D/JK flip flops).
Trending (multiple averaging filters).
Tracking (counts, on/off times).
Email notifications.
Push data on conditions.

Scheduler
Time/calendar-based events.
Holiday skips.
One-time events.
Dynamic scheduler updating.
Astronomical clock.

Optional Text Programming Language
ScriptBasic to create variables, arrays, functions, loops, IF/THEN/ELSE, logical and arithmetic operators, API commands, register access, string functions and operators, time commands.

Data Logging
Cyclic data/event logging.
Email log files.

User Interface—A simple user interface consists of an LCD screen and four LED indicators.

User programmable LCD
Bind Sure Cross radios.
Conduct a site survey to evaluate the radio signal integrity of radios within the network.
View register and output information.
View system status and configuration.

API Interface
Host Initiated control.
Web service integration.

User Defined LED indicators
Indicates the status of the DXM1200-B1, processes, or equipment.

Applications Overview
The DXM1200-B1 is ideal for smart factory and facilities applications, including:

- Productivity solutions, such as
  - Call for parts, service, or maintenance
  - Pick-to-light
  - OEE Tower light monitoring
- Predictive maintenance and continuous monitoring using
  - Vibration and temperature monitoring
  - Tank level monitoring
  - Non-contact condition monitoring
- Environmental monitoring and control, such as
  - Temperature and humidity monitoring

The DXM1200-B1 can provide visual indication using indicator lights, send email alerts, collect data, and interface with automation systems.

Banner Connected Data Solutions (CDS)
With a few easy steps, the DXM can be connected and sharing data with Banner's Connected Data Solutions. This is a web-based software platform that allows users to access, store, protect, visualize, and export critical data collected by Banner's DXMs.

This software complements our wireless product portfolio and provides customers with complete end-to-end IIoT solutions to solve the most pressing problems of the Industrial market. Visit the Connected Data Solutions site for account access and technical support at www.bannercds.com.

Get Solutions Up and Running Quickly
Solution templates are available to help implement IIoT solutions with ease-no coding or expertise required. In addition, all elements of a wireless solution from Banner—from sensor to cloud—are purpose-built to work together for easy configuration and use.
Popular solution templates include guides for the following applications:

- Vibration Monitoring and Predictive Maintenance
- Overall Equipment Effectiveness
- Tank Level Monitoring
- Temperature and Humidity Monitoring
- And more...

Make Better Data-Driven Decisions

The CDS platform is more than a dashboard. The software can provide actionable insights that allow you to solve real challenges on the factory floor by using analytics and visualization tools that range from graphs, gauges, status indicators, and number displays to alarm icons, maps, and tables.

Easily organize and manage the health of various assets and processes via customizable layouts that can be constructed for workstation screens or kiosk displays. In addition, the ability to store or export data, and analyze trends over time helps you and the organization make better, data-driven decisions long-term.

Access the Data You Want and Get the Alerts You Need

Remotely access data anytime and anywhere.

On-demand visibility and real-time alerts allow you to remotely monitor and diagnose systems quickly, saving time and cost. Simple data structure allows users to organize assets and facilities in a manner that best serves the needs of the business.

Maximize Uptime and Increase Efficiency

Predictive maintenance is a key capability of Banner's IIoT solutions.

The software platform helps you use device data to predict machine maintenance requirements, which reduces unplanned downtime, increases mean time between failure (MTBF), and reduces maintenance costs.

Wiring Power and RS-485 for the DXM1200 and DXM1200E Models

Use the following wiring diagrams to wire power and communication to the DXM1200 and DXM1200E devices. Connecting power to the communication pins will cause permanent damage.

Specifications

Radio Range
- 900 MHz, 1 Watt: Up to 9.6 km (6 miles) (external antenna)
- 2.4 GHz, 65 mW: Up to 3.2 km (2 miles) (external antenna)
- 900 MHz, 1 Watt: Up to 3.2 km (2 miles) with line of sight (internal antenna)
- 2.4 GHz, 65 mW: Up to 1000 m (3280 ft) with line of sight (internal antenna)

Antenna Minimum Separation Distance
- 900 MHz, 150 mW and 250 mW: 2 m (6 ft)
- 900 MHz, 1 Watt: 4.57 m (15 ft)
- 2.4 GHz, 65 mW: 0.3 m (1 ft)

Radio Transmit Power
- 900 MHz, 1 Watt: 30 dBm (1 W) conducted (up to 36 dBm EIRP)
- 2.4 GHz, 65 mW: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW) EIRP

Spread Spectrum Technology
- FHSS (Frequency Hopping Spread Spectrum)

Link Timeout (Performance)
- Gateway: Configurable via User Configuration Software
- Node: Defined by Gateway

Supply Voltage
- 12 to 30 V DC (use only with a suitable Class 2 power supply (UL) or a Limited Power Source (LPS) (CE) power supply)

Power Consumption
- 60 mA average at 24 V

Communication Protocols
- Modbus RTU Master, Modbus/TCP, and EtherNet/IP

Construction
- Polycarbonate

Connection
- Integral 5-pin M12 male quick disconnect

Logging
- 8 GB maximum; removable Micro SD card format

Certifications
- CE
- NOM
- NVCE

(CE approval only applies to 2.4 GHz models)
(NOM approval only applies to 900 MHz models)

RS-485 Communication Specifications

Communication Hardware (MultiHop RS-485)
- Interface: 2-wire half-duplex RS-485
- Baud rates: 9.6k, 19.2k (default), or 38.4k via DIP switches; 1200 and 2400 via the MultiHop Configuration Software
- Data format: 8 data bits, no parity, 1 stop bit

Environmental Specifications

Operating Conditions
- –20 °C to +60 °C (–4 °F to +140 °F)
- 95% maximum relative humidity (non-condensing)
- Radiated Immunity: 3 V/m (EN 61000-4-3)

Shock and Vibration
- All models meet IEC 60068-2-26 and IEC 60068-2-27 testing criteria
- Shock: 30G 11 ms duration, half sine wave per IEC 60068-2-27
- Vibration: 10 Hz to 55 Hz, 0.5 mm peak-to-peak amplitude per IEC 60068-2-6

Environmental Rating
- IEC IP67

---

1 Range depends on the environment and decreases significantly without line of sight. Always verify your wireless network's range by performing a Site Survey.
2 Operating the devices at the maximum operating conditions for extended periods can shorten the life of the device.
Dimensions

All measurements are listed in millimeters, unless noted otherwise.

Figure 6. DXM1200 dimensions
**Accessories**

For a complete list of all the accessories for the Sure Cross wireless product line, please download the Banner Industrial Wireless Accessories list (p/n b_3147091).

**Cordsets**

- MQDC1-506—5-pin M12, straight, single ended, 6 ft
- MQDC1-530—5-pin M12, straight, single ended, 30 ft
- MQDC1-506RA—5-pin M12, right-angle, single ended, 6 ft
- MQDC1-530RA—5-pin M12, right-angle, single ended, 30 ft
- IVUC-E-406—RJ45 Ethernet to 4-pin threaded M8, straight, 6 ft
- IVUC-E-415—RJ45 Ethernet to 4-pin threaded M8, straight, 15 ft

**Cellular Kits**

- SXI-LTE-001—LTE CAT1 Verizon (United States only)
- SXI-GSM-001—GSM/3G (HSPA) (International only)
- SXI-CATM1ATT-001—LTE CAT-M1 AT&T (North America only)
- SXI-CATM1VZW-001—LTE CAT-M1 Verizon (North America only)

**Power Supplies**

- PSD-24-4—DC Power Supply, Desktop style, 3.9 A, 24 V dc, Class 2, 4-pin M12 quick disconnect (QD)
- PSDINP-24-06—DC power supply, 0.63 Amperes, 24 V DC, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated
- PSDINP-24-13 —DC power supply, 1.3 Amperes, 24 V DC, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated
- PSDINP-24-25 — DC power supply, 2.5 Amperes, 24 V DC, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated
- P5W-24-1—DC power supply with wall plug, 100-240 V AC 50/60 Hz input, 24 V DC 1 A output, UL Listed Class 2

**Mounting**

- SMBWSQ120—Rear-mount protective metal enclosure, prevents buildup of water or ice from interfering with performance
- SMBQ240SS1—Sensor mounting plate and pivoting bracket, provides ± 20° of tilt in one axis for enhanced alignment

**Warnings**

Install and properly ground a qualified surge suppressor when installing a remote antenna system. Remote antenna configurations installed without surge suppressors invalidate the manufacturer’s warranty. Keep the ground wire as short as possible and make all ground connections to a single-point ground system to ensure no ground loops are created. No surge suppressor can absorb all lightning strikes; do not touch the Sure Cross® device or any equipment connected to the Sure Cross device during a thunderstorm.

Exporting Sure Cross® Radios. It is our intent to fully comply with all national and regional regulations regarding radio frequency emissions. Customers who want to re-export this product to a country other than that to which it was sold must ensure the device is approved in the destination country. The Sure Cross wireless products were certified for use in these countries using the antenna that ships with the product. When using other antennas, verify you are not exceeding the transmit power levels allowed by local governing agencies. This device has been designed to operate with the antennas listed on Banner Engineering’s website and having a maximum gain of 9 dBm. Antennas not included in this list or having a gain greater that 9 dBm are strictly prohibited for use with this device. The required antenna impedance is 50 ohms. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen such that the equivalent isotropically radiated power (EIRP) is not more than that permitted for successful communication. Consult with Banner Engineering Corp. if the destination country is not on this list.

**Important:** Please download the complete DXM1200-B1 Wireless Controller technical documentation, available in multiple languages, from www.bannerengineering.com for details on the proper use, applications, Warnings, and installation instructions of this device.
**Important:** Por favor descargue desde www.bannerengineering.com toda la documentación técnica de los DXM1200-B1 Wireless Controller, disponibles en múltiples idiomas, para detalles del uso adecuado, aplicaciones, advertencias, y las instrucciones de instalación de estos dispositivos.

**Important:** Veuillez télécharger la documentation technique complète des DXM1200-B1 Wireless Controller sur notre site www.bannerengineering.com pour les détails sur leur utilisation correcte, les applications, les notes de sécurité et les instructions de montage.

**WARNING:**
- Do not use this device for personnel protection
- Using this device for personnel protection could result in serious injury or death.
- This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A device failure or malfunction can cause either an energized (on) or de-energized (off) output condition.

**Important:**
- Never operate a 1 Watt radio without connecting an antenna
- Operating 1 Watt radios without an antenna connected will damage the radio circuitry.
- To avoid damaging the radio circuitry, never apply power to a Sure Cross® Performance or Sure Cross MultiHop (1 Watt) radio without an antenna connected.

**Important:**
- Electrostatic discharge (ESD) sensitive device
- ESD can damage the device. Damage from inappropriate handling is not covered by warranty.
- Use proper handling procedures to prevent ESD damage. Proper handling procedures include leaving devices in their anti-static packaging until ready for use; wearing anti-static wrist straps; and assembling units on a grounded, static-dissipative surface.

Banner Engineering Corp. Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

**THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.**

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp. Any misuse, abuse, or improper application or installation of this product or use of the product for personal protection applications when the product is identified as not intended for such purposes will void the product warranty. Any modifications to this product without prior express approval by Banner Engineering Corp will void the product warranties. All specifications published in this document are subject to change. Banner reserves the right to modify product specifications or update documentation at any time. Specifications and product information in English supersede that which is provided in any other language. For the most recent version of any documentation, refer to: www.bannerengineering.com.

For patent information, see www.bannerengineering.com/patents.

**Notas Adicionales**

Información México: La operación de este equipo está sujeta a las siguientes dos condiciones: 1) es posible que este equipo o dispositivo no cause interferencia perjudicial y 2) este equipo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

Banner es una marca registrada de Banner Engineering Corp. y podrán ser utilizadas de manera indistinta para referirse al fabricante. “Este equipo ha sido diseñado para operar con las antenas tipo Omnidireccional para una ganancia máxima de antena de 6 dBd y Yagi para una ganancia máxima de antena 10 dBd que en seguida se enlistan. También se incluyen aquellas con aprobación ATEX tipo Omnidireccional siempre que no excedan una ganancia máxima de antena de 6dBd. El uso con este equipo de antenas no incluidas en esta lista o que tengan una ganancia mayor que 6 dBd en tipo omnidireccional y 10 dBd en tipo Yagi, quedan prohibidas. La impedancia requerida de la antena es de 50 ohms.”
