Industry 4.0, IoT, and IIoT

The technologies of Industry 4.0 make data readily available and automate the communication between industrial automation equipment and systems. This enables predictive analysis for machines as well as process optimization across the factory floor.

The Internet of Things (IoT) describes the technologies that connect objects—from consumer electronics to industrial components—to the internet.

The Industrial Internet of Things (or IIoT) refers specifically to the impact of this innovation on industrial applications.

The key benefits include:

• Visibility and Remote Access to the operational status of machine components (both historically and in real-time)
• Predictive Analytics for more accurate planning of machine maintenance
• Interconnectivity for seamless communication among machines, components, and people

What Does IIoT Mean For Factories?

Visibility and Remote Access Increase Efficiency

In order to ensure efficient processes throughout the factory, machine operators must quickly and easily determine the status of machines. The greater the visibility, the easier it is to identify and resolve problems and keep operations running smoothly.

Traditional tower lights provide visibility wherever they can be physically seen. However, tower lights equipped with wireless communication capabilities both display a visual indication of an event and transmit wireless alerts. This helps ensure that operational problems are identified and addressed immediately, regardless of whether a machine operator is physically present to see the visual indicator.

An additional benefit of wireless indicators is data logging for use in OEE (Overall Equipment Effectiveness) calculations. Not only can operators respond to alerts quickly as they occur, but a history of alerts can also be stored and analyzed offline. This historical data can be used to track machine uptime, production volume, rejected parts, and other key metrics to make more informed decisions over time.

Predictive Maintenance Increases Machine Uptime and Availability

In addition to real-time status monitoring, IIoT technologies can also be used to help avoid machine failures thanks to predictive maintenance.

By monitoring machine components in real-time for increases in vibration and temperature, problems can be detected and resolved before they become too severe and cause additional damage or result in unplanned downtime. Over time, the historical data creates a valuable machine performance log that can be used to make more informed maintenance decisions down the line.

Interconnectivity Streamlines Factory Communications

Wireless technologies also enable seamless interaction among human workers, and can have a significant impact on the efficiency of manual production lines. For example, instead of requiring machine operators to walk over to the manager area for assistance with a technical issue, a wireless system utilizing connected pushbuttons or switches and tower lights can be used to alert managers when assistance is needed on the line.

Is Your Business IIoT-Ready?

From keeping machines running smoothly to enabling seamless communication among machines, components, and people, the benefits of IIoT technologies are tangible. It can be challenging knowing where to start and how to use these technologies to their fullest advantage. Answering the following questions can help manufacturing facilities identify the best technologies to meet their immediate business needs and start taking advantage of the long-term benefits of IIoT.

• What are the inefficiencies in your operations?
• What kind of data would help you overcome these inefficiencies?
• What communication processes need to be in place in order to utilize data in a meaningful way?
5 Advantages of IO-Link

1. Standardized and Reduced Wiring
   IO-Link devices do not require any special or complicated wiring, but can be connected using the same cost-effective standard unshielded 3-wire cables as conventional discrete I/O. In addition, IO-Link also eliminates the need for analog sensors and reduces the variety of cord sets required for sensors, which saves inventory costs. IO-Link also supports a master-slave configuration with passive connection points, which further reduces wiring requirements.

2. Increased Data Availability
   Access to sensor-level data helps ensure the smooth operation of system components, streamlines device replacement, and enables optimized machine maintenance schedules—all of which save costs and reduce the risk of machine downtime.

   This wealth of valuable data made available through IO-Link is integral for the Industrial Internet of Things (IIoT) and Industry 4.0 initiatives.

3. Remote Configuration and Monitoring
   With IO-Link, users can read and change device parameters through the control system software, enabling fast configuration and commissioning that saves time and resources. In addition, IO-Link allows operators to dynamically change the sensor parameters from the control system as needed—such as in the case of product changeover—which reduces downtime and allows machines to accommodate greater product diversity.

   In addition, the ability to monitor sensor outputs, receive real-time status alerts, and adjust settings from virtually anywhere allows users to identify and resolve problems that arise on the sensor level in a timely manner. This capability reduces costly downtime and improves overall efficiencies.

4. Simple Device Replacement
   In addition to the ability to remotely adjust sensor settings, IO-Link’s data storage capability also allows for automated parameter reassignment in case of device replacement (also known as Auto-Device Replacement or ADR). Users can import existing sensor parameter values into a replacement sensor for seamless replacement, getting the new device up and running as quickly as possible.

5. Extended Diagnostics
   IO-Link provides users with visibility into errors and health status from each device. This means that users can see not only what the sensor is doing but also how well it is performing—a valuable insight into a machine’s efficiency. In addition, extended diagnostics allow users to easily identify when a sensor is malfunctioning and diagnose the problem without shutting down the line or machine.

   The combination of real-time and historic data not only reduces troubleshooting efforts as issues arise but also allows for optimization of machine maintenance schedules, saving costs and increasing efficiency in the long term.
Lithium Ion Battery Production

From precise edge guiding and roll diameter monitoring to glue and tape detection, lithium ion battery production processes require a variety of presence detection, measurement, and inspection solutions to ensure quality control within tight tolerances. Banner Engineering offers an extensive portfolio of fiber optic sensors, photoelectric and laser measurement sensors, and machine vision products for reliable error-proofing in this industry.
Solutions for Lithium Ion Battery Production

**Tape Detection**

**Challenge**
- Detect tape used to identify damaged film
- Low optical contrast between tape and film
- High speed processing: 1.5 meters per second
- Hard-to-access deployment area with very limited space

**Key Features**
- White, green, blue, and infrared LED sensing
- Best-in-class response speeds: up to 10 μs
- Very small, very flexible fiber optic sensors
- IO-Link models available

**Featured Solution**
- DF-G2 Series High-Speed Fiber Optic Amplifier and plastic fiber optic sensors

**Key Benefits**
- Detect low-contrast, multicolored, reflective, and other difficult targets
- Reliable performance in challenging high-speed applications
- Easily fits in tight, confined spaces and can be precisely positioned to perform inspections
- Advanced diagnostics, remote monitoring, teaching, and configuration

**Roll Diameter Monitoring**

**Challenge**
- Control diameter of lithium ion battery film
- Continuous measurement on high-speed roll
- Hard to detect reflective material
- Machine vibration

**Key Features**
- Available ranges of 100 mm to 1 m, 200 mm to 2 m, or 300 mm to 3 m
- Provides continuous 0-10 V dc or 4-20 mA analog output
- Detects targets using 114 kHz, 174 kHz, or 224 kHz ultrasonic frequencies
- Built-in temperature compensation

**Featured Solution**
- T30UX Series Ultrasonic Sensor

**Key Benefits**
- Reliable monitoring of rolls regardless of size
- Reduced machine downtime and product damaged by incorrect tension control
- Immune to target reflectivity and variations in color
- Provides more reliable measurements to minimize waste left on the roll

**Edge Guiding**

**Challenge**
- Monitor position of film edge on winding machine
- Minute detection of variation in edge position needed
- High-speed winder: up to 1.5 meters of film per second
- Hard-to-access deployment area with very limited space

**Key Features**
- Heavy-duty shielded fibers
- Detects 500 μm variation in edge position
- High-power amplifier with world-class long-range sensing capability
- IO-Link models available

**Featured Solution**
- DF-G3 Series Long-Range Fiber Optic Amplifier and heavy-duty shielded fiber array

**Key Benefits**
- Resists kinking, cutting, and snagging as well as chemicals and other environmental hazards
- Detects tiny misalignments, enabling precise adjustments to prevent winding errors and reduce material waste
- Advanced diagnostics, remote monitoring, teaching, and configuration
Glue Detection

**Challenge**
- Verify presence and consistency of adhesive on the outer casing of a battery
- Crowded production area with limited deployment space
- Frequent product changeover

**Featured Solution**
- iVu Series Image Sensor

**Other Solutions**
- VE Series Smart Camera

**Key Features**
- All-in-one solution with camera, controller, lens, and light included in one package
- PC, remote or integrated touchscreen operation
- EtherNet/IP®, Modbus/TCP, PROFINET®, PCCC and Serial RS-232 communication
- Full runtime editing capability

**Key Benefits**
- Simplifies installation and eliminates the expense of purchasing additional components
- Setup, manage, and monitor inspections on the device or from a convenient location
- Enables seamless integration with existing equipment
- Reduces costly downtime by changing inspection parameters while inspections are in progress

Thickness Monitoring

**Challenge**
- Maintain consistent thickness battery film
- High-speed production process
- Hard-to-access, space-constrained deployment area

**Featured Solution**
- LM Series Laser Measurement Sensor

**Key Features**
- 0.002 mm resolution and repeatably
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Best in class thermal and mechanical stability
- Optional Remote Sensor Display (RSD)

**Key Benefits**
- Precise measurements for reliable quality and process control
- Reliably solves high-speed applications with fast-moving targets
- Superior thermal stability for more accurate and reliable measurements
- Simplifies setup and monitoring of sensors in difficult-to-access locations

Monitoring Safety Doors

**Challenge**
- Monitor multiple guard doors
- Staff need to frequently access the protected area
- Prevent staff from bypassing safety functions

**Featured Solution**
- SI-RF Series RFID safety switches

**Other Solutions**
- SI-MAG Series magnetic safety switches

**Key Features**
- Achieves Cat 4, PL e, or SIL CL 3 safety ratings alone or in a cascade chain
- Cascade up to 32 switches together in a series
- No contact between switch and actuator
- Unique, high, and low code tamper resistance
- In-Series Diagnostics (ISD)

**Key Benefits**
- Operates at the highest levels of safety (PL e) without the possibility of fault masking
- Simplifies installation and wiring and frees space on the safety controller
- Allows easy access and minimizes wear and tear
- Ensures that safety functions cannot be bypassed
- Makes it easy to identify and resolve issues, minimizing downtime
Presence of Liquid

**Challenge**
- Detect presence of liquid at a collection site
- Potential exposure to oil and chemicals
- Below ground deployment area
- Provide indication if sensor is non-functional

**Featured Solution**
DF-G3 Series fiber optic amplifier

**Key Features**
- Small, flexible and chemically resistant fiber optics
- High-performance sensing for low-contrast application
- Intuitive user interface and easy-to-read dual digital display

**Key Benefits**
- Reliable detection in challenging environments
- Detects very small amounts of liquid
- Provides output for detection of liquid or damaged fibers
- Simplifies setup, programming, and application monitoring

Liquid Detection in a Tube

**Challenge**
- Detect the presence of liquid in a tube
- Low optical contrast between the tube and liquid
- Multiple inspection points in hard-to-access areas

**Featured Solution**
DF-G3LIR Infrared water sensor

**Other Solutions**
DF-G1 Series general purpose fiber optic amplifier

**Key Features**
- High-performance sensing in low-contrast application
- Expert TEACH and SET methods
- Cross talk avoidance algorithm
- Easy-to-use mounting straps

**Key Benefits**
- Reliably detects liquids inside translucent or semi-opaque plastic and glass tubing
- Ensures optimal gain and threshold for all applications, including challenging high-speed and low-contrast applications
- Amplifiers can be deployed in close proximity to each other
- Simplifies setup, programming, and application monitoring

Liquid Level Detection

**Challenge**
- Monitor fill levels of tanks to ensure steady supply and prevent overfills
- Hard-to-access equipment
- No wired infrastructure

**Featured Solution**
Q45UA all-in-one ultrasonic sensor and wireless node

**Other Solutions**
K50U ultrasonic sensor
QT50U with Performance Series -P14 Node

**Key Features**
- Combines ultrasonic sensor, wireless node, and battery power supply in one device
- Secure, robust Sure Cross® wireless network
- Immune to variations in target color, reflectivity, and transparency
- Plug-and-play compatibility with Wireless Solutions Kit for tank monitoring

**Key Benefits**
- Installs easily and can be deployed permanently or redeployed without altering infrastructure
- Eliminates the hassle and expense of running communication cable to connect devices
- Can be used to monitor a wide range of wet or dry materials
- Provides access to real time and historical data and makes it easy to create visualization tools, warnings, and alarms to ensure maximum uptime
Safety Monitoring  
**Challenge**
- Safeguard multiple safety devices
- Complex logic and multiple safety scenarios
- Communicate with HMI to display machine status

**Featured Solution**
XS26 Series expandable safety controllers with Ethernet

**Other Solutions**
SC26 Series safety controllers
SC10

**Key Features**
- Powerful software offering intuitive icon-based, drag-and-drop operation
- Base controller with 26 inputs and two dual-channel safety outputs supports up to eight expansion I/O modules
- Can be configured for virtual non-safety status outputs and virtual non-safety inputs

**Key Benefits**
- Configure safety program in minutes and test configuration prior to implementation
- Scalable solution can be expanded to fit changing machine requirements
- Two-way communication between the safety controller and PLC, HMI, and other devices for advanced functionality and diagnostic

---

Access Protection  
**Challenge**
- Safeguard access to film slicing area
- Requires redundant, self-checking outputs
- Limited space for deployment

**Featured Solution**
LP Basic Series compact Type 4 safety light curtain

**Other Solutions**
LP Series full feature compact Type 4 safety light curtain
SLC4

**Key Features**
- Low-profile, compact design
- Provides basic functionality auto start/restart (trip output)
- Zone and status indicators plus digital display to indicate number of beams blocked and detailed diagnostics

**Key Benefits**
- Fits easily into small spaces without interfering with operations or processes
- Cost-effective safety device for simple applications
- Minimizes downtime by making it easy to troubleshoot and quickly resolve issues

---

Cabinet Illumination  
**Challenge**
- Illuminate interior of a machine control panel
- Space-constrained deployment area
- DC powered equipment

**Featured Solution**
WLS15 Series Low Profile, Low Power LED Strip Light

**Key Features**
- Bright LED strip light with diffuse window
- Slim, space-saving 15 mm profile
- Flexible mounting options
- Operates on 12 V dc or 24 V dc in one model

**Key Benefits**
- Provides bright, even illumination with no hot spots
- Installs easily in confined areas without disrupting the work environment or obstructing sightlines
- Integrates easily into existing equipment
Printed circuit board (PCB) manufacturing lines include several types of equipment and conveyors that all can benefit from the broad product offering provided by Banner Engineering. From presence detection in high temperatures to ultra-precise measurements to machine safety, Banner Engineering has solutions to critical challenges for PCB and IC chip production lines.
### Solar Wafer Detection

**Challenge**  
- Detect the presence/absence of a solar wafer  
- Low reflectivity from light absorbing material  
- Minimize interference with processes  

**Featured Solution**  
Q4X Series Laser Distance Sensor

**Key Features**  
- Dual teach mode measures distance and light intensity changes compared to a background reference condition  
- Reliable sensing range from 25 up to 610 mm  

**Key Benefits**  
- Reliably detects across a variety of target colors, materials, and surfaces  
- No reflector required for detection  
- Can be installed in a convenient location away from the line

---

### Solar Wafer Counting

**Challenge**  
- Detect the presence/absence of a solar wafer  
- Low reflectivity from light absorbing material  
- Space constrained deployment area  

**Featured Solution**  
VS8 Series miniature sensors

**Key Features**  
- Ultra-miniature housing (22 x 8 x 12 mm)  
- High switching frequency  
- Blue LED models reliably detect dark, reflective, and transparent objects  
- Electronic push button or remote teach  

**Key Benefits**  
- Fits easily in very small spaces  
- Reliable performance in high-speed applications  
- Detects challenging targets without requiring a reflector  
- Quick, easy setup enables rapid deployment

---

### Solar Wafer Flipping

**Challenge**  
- Detect the presence/absence of a solar wafer  
- Low reflectivity from light absorbing material  
- Minimize interference with processes  

**Featured Solution**  
QS18 Series Photoelectric Sensors

**Key Features**  
- Universal housing with an 18 mm threaded lens or side mounts  
- Wide operating range up to 20 m  
- Bright LED operating status indicators visible from 360°  
- IO Link models available

**Key Benefits**  
- Quick, easy installation  
- Real-time feedback simplifies operation and troubleshooting  
- Easy installation, wiring, preventative maintenance, and sensor backup
### Solar Wafer Counting

**Challenge**
- Detect the presence/absence of a solar cell
- Light absorbing solar cell reflects very little light
- Reflective surface of the metallic trace between cells

**Key Features**
- High-speed detection as fast as 250 us, capturing up to 2,000 events per second
- Reliable sensing range up to 300 mm
- Clear intensity readout from angled three-digit display
- Superior resistance to ambient light interference
- Two-point teach can easily detect the metal trace versus the light absorbing material

**Featured Solution**
Q3X Series Laser Contrast Sensor

**Key Benefits**
- Reliable performance in high-speed applications
- Sensor can be deployed off the line to avoid interfering with processes
- Easy-to-see feedback simplifies operation and troubleshooting
- Resists nuisance output trips caused by changing light conditions

---

### Pressure Monitoring

**Challenge**
- Ensure pressure levels remain within recommended range
- Identify system problems before failure can occur
- Monitor large, complex system with multiple hard-to-access inspection points

**Key Features**
- Combines pressure sensor, wireless node, and battery power supply in one device
- Field-proven Sure Cross® wireless architecture

**Featured Solution**
Performance Series All-in-One Pressure Sensor and Wireless Node

**Key Benefits**
- Compact, one-piece design simplifies installation and eliminates the need for ordering multiple components
- Integrates easily in applications where infrastructure makes wired solutions impractical, ineffective, or cost-prohibitive
- Collect data from one or multiple points and monitor system performance from any network-enabled location

---

### Presence Detection on a Buffer Machine

**Challenge**
- Maintain a steady stream of wafers
- Inconsistencies in color of cell magazines
- Space constrained deployment area

**Key Features**
- Ultra-miniature housing (22 x 8 x 12 mm)
- Superior resistance to fluorescent light interference
- Rugged design withstands exposure to extreme vibration

**Featured Solution**
Q12 Series Miniature Sensors

**Other Solutions**
VS8 Series Miniature Sensors for Precise Detection

**Key Benefits**
- Fits easily in very small spaces
- Resists nuisance output trips caused by light interference
- Reliable performance in challenging environment
- Long operational life with only routine maintenance
IC Chips and Printed Circuit Boards

Printed circuit board (PCB) manufacturing lines include several types of equipment and conveyors that all can benefit from the broad product offering provided by Banner Engineering. From presence detection in high temperatures to ultra-precise measurements to machine safety, Banner Engineering has solutions to critical challenges for PCB and integrated circuit (IC) chip production lines.
### Leading Edge And Adhesive Detection

**Challenge**
- Detect leading edge of printed circuit board (PCB)
- Verify that adhesive has been properly applied to PCB
- Very high levels of precision required for both inspections
- Tight-space constrained deployment area

**Key Features**
- Space-saving form factor (21.1 x 14.6 x 8 mm)
- Bright, precise spot for precise detection
- High switching frequency

**Featured Solution**
- VS8 Series miniature sensors

**Other Solutions**
- DF-G1 Series fiber optic amplifier with plastic fiber optic sensors

**Key Benefits**
- Will not interfere with equipment or movement of the PCB on the line
- Precision inspections reduce rework and wasted product
- Minimizes machine downtime for refilling the glue gun
- Reliable performance in high-speed applications

### Integrated Circuit (IC) Chip Presence

**Challenge**
- Detect missing, tilted, and multiple IC chips in a nest
- Small, low-profile target
- High-speed inspections

**Key Features**
- Precise 0.002 mm - 0.004 mm resolution and ±0.02 - ±0.07 mm linearity
- Best-in-class thermal and mechanical stability
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Optional Remote Sensor Display (RSD)

**Featured Solution**
- LM Series precision measurement sensor

**Other Solutions**
- Q4X Series laser distance sensor

**Key Benefits**
- Ensures parts meet tight tolerances with fewer failures
- Achieves high levels of accuracy in challenging environments
- Reliable performance in high-speed application
- Simplifies setup and monitoring of sensors

### Leading Edge Detection for Pick-and-Place Machine

**Challenge**
- Complex, multi-step pick-and-place process
- High level of precision required
- Space-constrained deployment area

**Key Features**
- Small, precise spot
- Cross talk avoidance algorithm
- Very small, very flexible fiber optic sensors

**Featured Solution**
- DF-G2 Series High Speed Amplifier

**Other Solutions**
- DF-G1 Series General Purpose Amplifier

**Key Benefits**
- Precise leading edge detection ensures proper placement of SMT components
- Multiple amplifiers can operate in close proximity to each other
- Amplifiers can be installed in a convenient location
Integrated Circuit (IC) Chip Orientation

**Challenge**
- Confirm correct orientation of IC chips on pocket tape
- Space-constrained deployment area
- Frequent product changeover

**Key Features**
- All-in-one solution with camera, controller, lens, and light included in one compact package
- Setup and manage inspections using Vision Manager PC software, remote touchscreen, or integrated touchscreen
- EtherNet/IP™, Modbus/TCP, PROFINET®, PCCC and Serial RS-232 communication
- Full runtime editing capability

**Featured Solution**
Mu Series image sensor with integrated touch screen and light

**Other Solutions**
VE Series Smart camera

**Key Benefits**
- Simplified installation without the expense of purchasing additional components
- Setup, manage, and monitor inspections on the device or from a convenient location
- Seamless integration with existing equipment and IIoT data collection
- Change inspection parameters while inspections are in progress

---

Data Matrix Code Reading

**Challenge**
- Small, complex 2D code on a printed circuit board (PCB)
- Printing errors leading to unreadable codes
- High-speed processes

**Key Features**
- High-resolution 1.3 MP (1280 x 1024 pixels) imager
- Integrated red or multicolor LED lights
- Barcode manager software
- Web interface capability

**Featured Solution**
ABR Series Imager-Based Barcode Reader

**Other Solutions**
Mu BCR Series Barcode Reader

**Key Benefits**
- Detects very fine details on small, complex, and challenging barcodes
- Optimizes the contrast between the Data Matrix code and the PCB
- Intuitive flowchart programming simplifies inspection setup
- Setup, manage, and monitor multiple ABR Series barcode readers from any network-enabled location
Temperature and Humidity Monitoring at a Chip Shooter

**Challenge**
- Monitor temperature and humidity levels in multiple locations throughout a facility
- Maintain consistent temperature and humidity levels to suppress electrostatic discharge (ESD)
- Automate the collection of temperature and humidity information
- Minimize downtime during installation

**Featured Solution**
- Q45 Series Nodes for Predictive Maintenance and M12 Series Temperature and Humidity Sensor

**Key Features**
- Humidity accuracy of ± 2% relative humidity and temperature accuracy of ± 0.3 °C
- Wireless node is battery powered and preconfigured to work with M12 Series sensor
- Secure, robust Sure Cross® wireless network

**Key Benefits**
- Real-time monitoring ensures consistent temperature and humidity levels
- Quick, easy device setup and deployment
- Eliminates the hassle and expense of running communication cable
- Monitors environmental conditions in hard-to-access locations

---

Clean Room Monitoring

**Challenge**
- Monitor the status of each clean room
- Signal personnel when it is safe to enter and exit the clean room
- Alert maintenance personnel of alarm conditions via text or email

**Featured Solution**
- DXM700 Wireless Controller and K70 Series Wireless LED Indicators

**Key Features**
- Indicator provides bright, easy-to-see indication and wireless connectivity
- Controller supports two-way communication with up to 47 wireless nodes
- Controller combines wireless gateway with a logic controller offering advanced capabilities

**Key Benefits**
- Monitor clean room status from a convenient location
- Activate an indication light and lock/unlock doors from a convenient location
- No additional wiring or alterations to infrastructure required

---

Monitoring Machine Status

**Challenge**
- Monitoring multiple machines
- View machine status from all angles
- Bright ambient light conditions
- Machines use AC and DC power sources

**Featured Solution**
- TL50 Pro Series Tower Lights

**Other Solutions**
- TL50 Basic Tower Lights
- TL50 Core Series Tower Lights
- TL70 Series Modular Tower Lights

**Key Features**
- Features white windows with high intensity LED lights
- AC and DC power options available
- Audible options
- Preassembled models

**Key Benefits**
- At-a-glance visibility of machine status
- Versatile powering options enable use with a wide range of machines
- No assembly required for rapid deployment
### Safeguard Machine Access Points

**Challenge**
- Safeguard point of access on a small assembly station
- Prevent attempts to bypass safety system

**Featured Solution**
- **SI-MAG Series Magnetic Safety Switches**

**Other Solutions**
- **SI-RF Series RFID Safety Switches**

**Key Features**
- Achieves category 4/PLe safety rating with a single sensor
- Two-piece, non-contact safety system
- Coded magnets for tamper resistance
- 3-5 mm tolerance to misalignment

**Key Benefits**
- Operates at the highest level of safety
- Provides a long operational life, even in applications with persistent use
- Resists attempts to bypass safety functions
- Minimizes machine downtime caused by nuisance trips

---

### Initiating Manual Reset

**Challenge**
- Initiate manual reset on assembly station
- Provide status indication
- Unobtrusive operation

**Featured Solution**
- **S22 Pro Series Multicolor Touch Button**

**Other Solutions**
- **K50 Core Series Illuminated Touch Buttons**

**Key Features**
- Multicolor illuminated touch surface
- Ergonomic design requires no physical force to actuate
- Flush mount device with terminal connector options
- Solid state electronics

**Key Benefits**
- Clear, at-a-glance display of status to quickly resolve issues
- Easy actuation with no hand, wrist, and arm stresses
- Quick, easy installation in panels
- Long operational lifespan

---

### Monitor Safety Devices

**Challenge**
- Monitor multiple safety devices on a small assembly station
- Display machine status on an HMI
- Limited space on the machine control panel

**Featured Solution**
- **SC10 Series Compact Safety Controller/Relay Hybrid**

**Other Solutions**
- **SC26 Series safety controller**

**Key Features**
- Supports a wide range of safety devices
- Intuitive, icon-based programming with drag-and-drop PC configuration
- Two-way industrial Ethernet communication enables 256 virtual non-safe status outputs and 80 virtual non-safe inputs (reset, on/off, cancel off-delay, mute enable)

**Key Benefits**
- Consolidates the functionality of multiple safety relays into one compact device
- Eliminates the need to buy and stock dedicated relay modules
- Simplifies device setup and management
- Integrates multiple non-safety input and output devices without using additional IO terminals

---

**PCB Automated Assembly Station**
Mobile Device Production

Mobile device production requires assembling and inspecting very small parts in tight spaces. Machines in this industry require reliable and compact equipment that does not get in the way of the process and allows machines and workers to complete tasks effectively. Banner Engineering offers a wide variety of compact machine safety equipment, lighting and indication, and sensor and vision products to ensure the safety, quality, and efficiency of production processes.
Solutions for Mobile Device Production

Operator Guidance at Robotic Assembly Station

Challenge
- Quickly identify assembly errors
- Maintain a continuous workflow
- Operate in challenging environment

Featured Solution
WLS28 Series LED Strip Lights with EZ-STATUS®

Other Solutions
WLS15 Series Low-Profile LED Strip Lights with EZ-STATUS®

Key Features
- Combines brilliant, bright illumination and high-visibility indication in one device
- Three- and five-color models available
- Rugged, water-resistant IP66, IP67 and IP69K construction

Key Benefits
- Simplifies installation, operation, and troubleshooting
- Allows operators to focus tasks without diverting attention to monitor status
- Reliable operation in challenging environmental conditions

Part Positioning on a Robotic Assembly Station

Challenge
- Verify the presence and position of cell phone board in a nest
- Low optical contrast between target and background
- Small, low-profile target requires high level of precision to verify position
- Minimize interference with processes

Featured Solution
Q4X Series Laser Distance Sensor

Other Solutions
Q5X Series High Power, Mid-Range Laser Measurement Sensor

Key Features
- Reliable sensing range from 25 up to 610 mm
- Immune to variations in target color, reflectivity, and transparency
- Dual teach mode (intensity + distance) sensing,
- Detects height changes as small as 0.5 mm

Key Benefits
- Enables installation in a convenient location away from the line
- Precise measurements ensures proper position
- Detects across a variety of target colors, materials and surfaces based on distance

Part Inspection at a Robotic Assembly Station

Challenge
- Confirm presence and orientation of components on a cell phone board
- Complex inspection area with many similar looking components
- Inspection of fine details requires higher resolution camera

Featured Solution
VE Series Smart Camera

Other Solutions
iVu Series Image Sensor

Key Features
- Available with a high resolution 5MP imager
- Full runtime editing capability
- Software emulator
- EtherNet/IP®, Modbus/TCP, PROFINET®, and Serial RS-232 communication

Key Benefits
- Detects very small details to verify that all components are correctly placed and positioned
- Minimize downtime by changing inspection parameters while inspections are in progress
- Build and troubleshoot inspections offline prior to implementation
- Supports seamless integration with existing equipment and IIoT data collection
**Emergency Stop Actuation**

**Challenge**
- Provide emergency stop actuation on a small test machine
- Indicate actuator status

**Featured Solution**
- 30 mm Mount Emergency Stop Buttons

**Key Features**
- Pre-assembled one-piece, fully enclosed design with 8-pin quick-disconnect
- Illuminated base: one color solid red or two-color solid yellow with flashing red display

**Key Benefits**
- Quick easy installation with no assembly or wiring required
- Clear, at-a-glance display of status to quickly resolve issues
- 360° visible indication of E-Stop actuation

---

**Process Initiation**

**Challenge**
- Initiate test processes
- Unobtrusive actuation
- Operator strain from repeated actuation

**Featured Solution**
- S22 Pro Series Programmable Multicolor Panel Touch Button

**Other Solutions**
- K30 Core Series Illuminated Touch Buttons

**Key Features**
- Bright, colorful illuminated display
- Smart capacitative sensing technology
- Terminal connector options
- Solid state electronics

**Key Benefits**
- At-a-glance display of status to quickly resolve issues
- Requires no physical force to actuate, eliminating hand, wrist, and arm stresses
- Quick, easy installation in panels
- Long operational lifespan with minimal maintenance

---

**Safeguard Machine Access Point**

**Challenge**
- Safeguard access point on a small test machine
- Very fine levels of protection required
- Unobtrusive integration in small area

**Featured Solution**
- SLC4 Series Compact, Low-Profile Type 4 Safety Light Curtains

**Other Solutions**
- LP Series Low-Profile Safety Light Curtains

**Key Features**
- Defined area heights of 160 mm, 240 mm, and 320 mm
- 0.1 m to 2 m sensing range
- 14 mm or 24 mm resolution models available
- End-to-end sensing design

**Key Benefits**
- Fits easily in small spaces
- Will not interfere with machine access or operation
- Detects objects as small as a finger or a hand
- Eliminates detection blind zones

---

**Process Initiation**

**Challenge**
- Initiate test processes
- Unobtrusive actuation
- Operator strain from repeated actuation

**Featured Solution**
- S22 Pro Series Programmable Multicolor Panel Touch Button

**Other Solutions**
- K30 Core Series Illuminated Touch Buttons

**Key Features**
- Bright, colorful illuminated display
- Smart capacitative sensing technology
- Terminal connector options
- Solid state electronics

**Key Benefits**
- At-a-glance display of status to quickly resolve issues
- Requires no physical force to actuate, eliminating hand, wrist, and arm stresses
- Quick, easy installation in panels
- Long operational lifespan with minimal maintenance
Banner Engineering’s broad offering of products and solutions enable electronics equipment manufacturers and electronics manufacturing services (EMS) companies throughout the world to solve their most challenging applications. From energy efficient LED work lighting to a comprehensive offering of safety products, Banner Engineering has the electronics industry experience necessary to solve a variety of applications.
Monitoring Machine Status

**Challenge**
- Provide status indication on legacy equipment
- Monitor multiple machines spread out over a wide area
- Improve overall equipment effectiveness
- Maintain a steady workflow

**Featured Solution**
TL70 Series Modular Tower Lights with Sure Cross® Wireless Communication Segment

**Other Solutions**
TL70 Series Modular Tower Lights with Sure Cross Wireless Base

**Key Features**
- Bright, high-visibility illuminated segments
- Modular design with color, audible, and wireless segments available
- Secure, robust Sure Cross wireless network with up to two miles line of sight signal range

**Key Benefits**
- Provides at-a-glance status indication
- Users can customize functionality adding segments as desired
- Wireless connectivity enables remote monitoring and access to machine performance data
- Quick, easy installation requiring no communication cables to connect devices to the network

Verify Presence and Position of Disk

**Challenge**
- Ensure disk is present and properly positioned in a specific location
- Shiny, reflective surface
- Minimize interference with processes

**Featured Solution**
Q20 Series Sensors and Q4X Series Analog Laser Measurement Sensor

**Other Solutions**
Q3X Series Laser Contrast Sensor and Q4X Series Laser Measurement Sensor

**Key Features**
- Reliable sensing range up to 150 mm (Q20) and 600 mm (Q4X)
- Small spot size for precise leading edge detection (Q20 and Q4X)
- Dual teach mode sensing measures the distance to and light intensity from a background condition (Q4X)
- Detects height changes as small as 0.5 mm (Q4X)

**Key Benefits**
- Enables installation in a convenient location
- Precise measurements ensures proper position
- Detects across a variety of target colors, materials and surfaces based on distance
- Detects a wide range of objects regardless of target color, reflectivity, and transparency
Vibration and Temperature Monitoring on a Motor

**Challenge**
- Off-line motor testing requires costly downtime and can miss changes between tests
- On-line or dynamic testing may neglect key symptoms that indicate motor decline

**Featured Solution**
Q45VA All-in-One Vibration and Temperature Sensor and Wireless Node and DXM Series Wireless Controller

**Other Solutions**
QM30VT Series Vibration and Temperature Sensor, MultiHop Modbus Radio or 1-Wire Serial Node, and DXM Series Wireless Controller

**Key Features**
- Continuously monitor a variety of vibration characteristics and temperature to identify machine problems early
- Communicates data over a secure, reliable Sure Cross® wireless network
- Combines a vibration and temperature sensor, wireless node, and battery power supply in one compact and completely wireless device

**Key Benefits**
- Monitor multiple machines in real-time from a convenient location
- Identify errors before a failure can occur by creating real-time alerts to notify operators when vibration thresholds have been exceeded
- All-in-one design eliminates the time and expense of installing separate sensors and nodes

Vibration and Current Monitoring on a Motor

**Challenge**
- Expose machine performance issues
- Identify equipment requiring full spectrum analysis
- Establish more strategic scheduling of equipment maintenance

**Featured Solution**
CM Series Condition Monitoring Node, Current Transformer, and QM30VT Vibration and Temperature Sensor

**Key Features**
- Combines a wireless radio, antenna, and battery power supply in one compact device
- Preconfigured to work with current transformer and a QM30VT Series vibration and temperature sensor
- Includes 20 amp and a 150 amp current transformer
- Full compatibility with Wireless Solutions Kits and Connected Data Solutions cloud software

**Key Benefits**
- Quick, easy deployment: simply connect one or both devices and begin communicating
- Eliminates the hassle and expense of running communication cable to connect devices
- Provides access to real time and historical data and makes it easy to create visualization tools, warnings, and alarms to ensure maximum uptime
- Monitors general health and performance, specific components, and can be used to verify that equipment is ON or OFF, track energy use, and identify power surges
### Operator Guidance for Electronic Assembly

**Challenge**  
- Assemble multiple parts at one station  
- Simplify complicated assembly processes  
- Improve assembly accuracy  
- Increase product output

**Featured Solution**  
PTL110 Series Pick-to-Light devices

**Key Features**  
- Bright, multi-color indication with animation options provide clear communication to guide staff through assembly  
- Easy-to-see digital display indicates part count or instructions  
- Optical sensor detects hands as they pick pieces  
- Very fast response speed for indication of next step in assembly process  
- Compatible with DXM700 wireless controller for use on carts and mobile picking stations

**Key Benefits**  
- Simplifies the build of parts and ensures a high level of quality assurance  
- System keeps pace with the speed of the assembler  
- Precise picking system supports multiproduct assembly, allowing one assembler to work on different components at the same station  
- Monitor for speed and accuracy, production and inventory levels, and respond quickly to quality issues

### Roll Diameter Measurement

**Challenge**  
- Monitor roll of shrink wrap to alert when product is running out  
- Splice new roll on to old roll with minimal downtime  
- Ensure proper roll tension to prevent breakage

**Featured Solution**  
Q5X Series High Power, Mid-Range Laser Measurement Sensor

**Other Solutions**  
LE Series Laser Displacement Sensor  
LTF Series Long-Range Laser Sensor

**Key Features**  
- Dual teach mode sensing measures the distance to and light intensity of the background condition  
- 50 mm to 5 m sensing range  
- Optional Remote Sensor Display (RSD)

**Key Benefits**  
- Reliable detection regardless of object color, translucence, or reflectivity  
- Accurate measurement reduces waste left on the core  
- Simplifies setup and monitoring of sensors in difficult-to-access locations  
- Reduces downtime between product changeover
Reading Barcodes on JEDEC Trays  

**Challenge**
- Create record for IC chips being processed
- Space-constrained deployment area
- High-speed process

**Featured Solution**
ABR Series Imager-Based Barcode Reader

**Other Solutions**
iVu BCR Series Barcode Reader

**Key Features**
- Available in models with a WVGA imager or a 1.2 MP imager with standard or polarized windows
- Barcode Manager software with intuitive flowchart programming and advanced capabilities
- Ultracompact housing for even the tightest of spaces
- Factory communication options include Ethernet or USB

**Key Benefits**
- Reliably reads small, complex, and challenging barcodes
- Quick, easy device setup, management, and monitoring of multiple barcode readers from network-enabled location
- One-piece, ultracompact device fits easily in very small spaces
- Seamless integration with existing equipment and IIoT data collection

Safeguarding Machine Access Points

**Challenge**
- Safeguard access to tray processing area
- Requires redundant, self-checking outputs
- Limited space for deployment

**Featured Solution**
LP Basic Series compact Type 4 safety light curtain

**Other Solutions**
LP Series full feature compact Type 4 safety light curtain

**Key Features**
- Low-profile, compact design and multiple mounting options
- Available in nickel-plated housings for ESD-safe applications
- Zone and status indicators plus digital display to indicate number of beams blocked and detailed diagnostics
- End-to-end sensing design

**Key Benefits**
- Installs easily in very small spaces
- Device can be installed within the machine frame
- Minimizes downtime by making it easy to easy troubleshoot and quickly resolve issues
- Eliminates detection blind zones

Illuminating Work Area

**Challenge**
- Illuminate machine and work area
- Consistent, even illumination over a wide area
- Reduce service and maintenance on light fixtures

**Featured Solution**
WLB72 Series LED Task Light

**Other Solutions**
WLB92 Series LED Task Light

**Key Features**
- Ultra-bright white light with even light distribution
- Rugged metal housing with shatterproof cover
- Robust electronics and circuit design for long product lifetime
- Plug-and-play operation out of the box

**Key Benefits**
- Increased safety and productivity
- No bulb replacement or other maintenance
- Low installation costs, quick install time
- Fewer fixtures needed to illuminate the whole area

Automated Tray Handling System
Displays (Clear Object Detection)

A challenging but critical aspect of electronics manufacturing is the ability to reliably and cost-effectively detect clear objects like transparent film, plastic, or glass and other targets with low optical contrast. Banner Engineering offers a wide variety of solutions to clear object detection challenges, including economical photoelectric sensors, versatile fiber optic sensors, and high-power laser sensors to meet any application requirements.
### Detecting Clear Plastic Material

**Challenge**
- Detect clear plastic waste material in a bin
- Prevent overfill of material
- Low optical contrast

**Featured Solution**
- QS18E Clear Object Detection Sensor

**Key Features**
- Polarized lens with coaxial optics
- Three user-selectable thresholds
- Universal housing design with 18 mm threaded lens and multiple mounting options
- Compensates for dust build up and ambient temperature changes

**Key Benefits**
- Reliably detects a wide range of clear, translucent, or opaque objects
- Detects at any distance from the face of the sensor out to the reflector with no dead zone
- Optimize performance to the type of object being detected
- Versatile, cost-effective and easy-to-use sensor
- Long operational life with only routine maintenance

### Monitoring Tote Fill Levels

**Challenge**
- Detect high and low fill levels
- Low optical contrast between waste water and container
- Challenging environmental conditions

**Featured Solution**
- QS30H2O Series Water Sensor

**Other Solutions**
- DF-G3LIR Long-Range Infrared Water Sensor with Glass Fiber Optic Bundle

**Key Features**
- Emits a 1450 nm sensing beam that is attenuated by water-based liquids
- Long-range sensing of up to 8 m between emitter and receiver
- Rugged IP67 (NEMA 6) housing and encapsulated electronics

**Key Benefits**
- Reliably detects the presence of any water-based liquid
- Detects liquids in a wide range of different sized containers
- Resists harsh environments

### Detecting Clear Plastic Film

**Challenge**
- Detect clear, thin glass sheet
- Low optical contrast
- Machine vibration

**Featured Solution**
- Q4X Series Laser Distance Sensor

**Key Features**
- Dual teach mode measures distance and light intensity changes compared to a background reference condition
- Robust IP69K-rated stainless steel housing
- Clear intensity readout from angled three-digit display

**Key Benefits**
- Detects a wide range of objects regardless of color, reflectivity, and transparency
- Easy-to-see feedback simplifies operation and troubleshooting
- Resists aggressive cleaning, mechanical impact, and extreme vibration
- No reflector required

LM Series
Compact Precision Laser Measurement Sensor

- Precise measurements with 0.002-0.004 mm analog resolution
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Compact housing designed to fit into small spaces
- Thermally stable housing and secure mounting for real-world stability
- IP67 and Grade 316 stainless steel for chemical compatibility
- Optional Remote Sensor Display (RSD) for remote monitoring and setup

**Series** | **Range (mm)** | **Output** | **Connector** | **Q**
--- | --- | --- | --- | ---
LM | 150 | KI | PVC M12 Euro Pigtail QD | -X232
KI = Discrete with IO-Link and 4 to 20 mA analog
KU = Discrete with IO-Link and 0-10 V analog
IRSD = 4-20 mA analog and communications

**LE Series**
Laser Measurement Sensor

- Precise measurements with 0.02 mm resolution
- Ready to measure right out of the box with simple setup
- Two-line, eight-character intuitive display for easy adjustments
- Small spot, visible laser for simple alignment
- Repeatability and accuracy for challenging targets, from metal to black rubber

**Range (mm)** | **Output** | **Laser Class** | **Connector** | **Series**
--- | --- | --- | --- | ---
550 = 100-1000 mm | I = 4 to 20 mA analog and (1) NPN/PNP discrete | Blank = Class 2 | Q = Rotatable M12 Euro QD | LE
250 = 100-400 mm | U = 0 to 10 V analog and (1) NPN/PNP discrete | C1 = Class 1 | QP = PVC M12 Euro Pigtail QD | LE
D = (2) NPN/PNP discrete | Blank = 2 m Integral Cable | QP-X232 = RS-232 Serial Communication* | MQDEC2-515
K = Dual Discrete with IO-Link | Blank = 5 m Integral Cable | MQDEC2-515RA

* RS-232 Communication Cable INT-BBB-X232Q5 required for Serial Communication

Additional lengths available on bannerengineering.com
Q5X Series
High Power, Mid-Range Laser Measurement Sensor

- Reliable detection of black targets against a black background, black targets against a shiny metal background, clear and reflective objects, multicolor packaging, and targets of all colors
- Dual teach mode measures both distance plus light intensity to solve the most challenging applications
- 270-degree rotatable M12 QD to meet a variety of mounting constraints
- Rated IP67 for reliable performance in wet environments
- Optional Remote Sensor Display (RSD) for remote monitoring and setup

- K = Configurable Dual Discrete with IO-Link on all models
- U = 0 to 10 V Analog
- I = 4 to 20 mA Analog
- L = Laser
- AF = Adjustable Field Background Suppression

### Accessories

- SMBQ5XDT
- SMBQ5XM4F
- SMBQ5XFAM10
- SMBAMSQ5XIPRA

### Connectors

- MQDC-4501SS 0.3 m (1')
- MQDC-4506SS 1.83 m (6')
- MQDC-406 2 m (6.5')
- MQDC-415 5 m (15')
- MQDC-430 9 m (30')
- MQDC-450 15 m (50')

### Program Options

- Program with push button, remote teach, IO-Link, or optional Remote Sensor Display (RSD1QP). Cordset MQDC-4501SS required to use RSD.

- Double-Ended Euro-Style with 5-pin straight male to 4-pin straight female connectors. Required for use between RSD and sensor.

- M12 Euro-Style Straight connector models listed; for right-angle, add RA to the end of the model number (example, MQDEC2-406RA)
Q4X Series
Rugged Laser Measurement Sensor

- Save time and money with the Q4X which is ready to measure right out of the box
- A simple user experience from installation to setup
  - Bright spot alignment
  - Three push buttons simplify setup
  - Intuitive menus
- Four-digit display shows distance to target in mm
- FDA-grade stainless steel is suitable for IP69K washdown environments

Q3X Series
Laser Contrast Sensor

- High-speed part detection as fast as 250 us, capturing up to 2,000 events per second
- Reliable sensing range up to 300 mm
- Used for challenging presence/absence or orientation detection for applications with small contrast differences
- Rugged, nickel-plated zinc housing suitable even for environments with cutting fluids and oils
- Clear intensity readout from angled three-digit display
- Fixed background suppression models allow for contrast detection in a fixed range while ignoring a background

QS18 Series
All-Purpose Photoelectric Sensor

- Features a universal housing with an 18 mm threaded lens or side mounts
- Meets IP67 and NEMA 6 standards for harsh environments
- Available in opposed, polarized and non-polarized retroreflective, convergent, regular and wide-angle diffuse, small spot diffuse, laser, ultrasonic, plastic or glass fiber optic, fixed-field and adjustable-field sensing modes
- Offers easy push-button TEACH-mode setup in Expert QS18E and ultrasonic models
- Available in models with IO-Link communication for simplified wiring, installation, preventative maintenance, and sensor backup

### Family | Output | Power | Sensing Mode | Connector
---|---|---|---|---
QS18 | VP | 6 | LLP = Polar retro | Blank = 2 m Integral Cable

### Family | Output | Power | Sensing Mode | Connector
---|---|---|---|---
QS18E | P | 6 | XLPC = Polar retro with coaxial optics for clear objects | Blank = 2 m Integral Cable

* All models require a reflector

VS8 Series
Miniature Sensor for Precise Detection

- Miniature sensor for installation in the smallest of spaces
- Red laser models provide bright, precise laser light spot for optimum small part detection
- Models with a blue LED reliably detect challenging targets, including dark, reflective, and transparent objects without requiring a reflector
- High switching frequency for detection in even the fastest processes
- Robust, glass-fiber-reinforced plastic housing

### Sensing Mode | Blue LED | Range | Output Type | Connection | Model
---|---|---|---|---|---
Blue LED, Fixed 30 mm Background Suppression | 2 to 30 mm (0.08 to 1.18 in) | PNP | 2 m (6.5 ft) unterminated 4-wire PUR cable | VS8APFF30B* VS8ANFF30B*

* To order the 200 mm (7.8 in) PUR cable model with a 3-pin M8/Pico-style quick disconnect, add suffix “Q3” to the model number. For example, VS8APFF15Q3

Opposed, retroreflective and additional background suppression models are available at bannerengineering.com
QS30 Water Detection
DC-Operated Long-Range Sensors

- Detects waterbased liquids in translucent and opaque bottles
- Ability to work reliably in low contrast applications
- 1450 nm infrared wavelength to enhance contrast of clear liquids

Q12 Series
Miniature Self-Contained Sensor

- Delivers powerful sensing performance in extremely confined areas
- Rated IP67 for use in the widest range of locations and applications
- Available in models with rugged, sealed housing or PFA chemical-resistant jacket
- Uses unique overmolded design for enhanced durability and shielding

**Family**

| Q12 | LO/DO | Output | Power | Sensing Mode | Connector
|------|-------|--------|--------|--------------|------
|      | A     | B      | 6      | E            | Blank = 2 m Integral Cable

- SMBQ12T
- SMBQ12A

**Q20 Series**
Industry Standard Global Housing

- Versatile sensor with a universal rectangular housing and multiple mounting options, making it ideal for global manufacturing
- Rated to 1200 psi for use in washdown environments
- Enhanced design for noise immunity and crosstalk avoidance
- Visible red beam for easy alignment on most models

# DF-G3 Series

Long-Range Fiber Optic Amplifiers

- World-class long-range sensing capability, more than 3 m (10 ft) with opposed mode fibers
- Easy to read dual digital displays show both signal level and threshold simultaneously
- Cross-talk avoidance function allows seven inspections in dense sensing point applications
- Models with IO-Link enable a point-to-point communication link between a master device and a sensor, facilitating remote monitoring, teaching, and configuration
- Operator control of the sensitivity (hysteresis) provides additional detection sensitivity, or a stabilized output depending on the application details
- Additional DF-G1, DF-G2, and DF-G3 models are available at bannerengineering.com

To order M12 Euro pigtail, change suffix “2M” to “Q5” (for example, DF-G3-NU-Q5).
DF-G2 Series
High-Speed Fiber Optic Amplifier

- Best in class response speeds of 10 μs, 15 μs, 50 μs, 250 μs, 500 μs, and 1000 μs
- Easy-to-read dual digital displays show signal level and threshold values
- Simple user interface ensures easy sensor set-up and programming via displays and switches/buttons or remote input teach wire
- Expert TEACH and SET methods ensure optimal gain and threshold for all applications, especially for high speed or low contrast applications
- Thermally stable electronics shortens start-up time and maintains signal stability during operation
- Economy display mode reduces amplifier power consumption by 25%
- Cross talk avoidance algorithm allows two sensors to operate in close proximity
- Additional DF-G1, DF-G2, and DF-G3 models are available at bannerengineering.com

SC-XM3
Fast Programming and Swapout

- Backup copy of configuration, password, network settings
- Download configuration without a PC; Save time during panel build
- Fast swapout to minimize downtime at swapout

Store SC-XM3 memory card directly on SC10

SC-USB2
USB Cable for PC configuration of SC10

SC-XM3
Memory Card
SLC4 Series
Basic Feature, Very Compact Type 4 Safety Light Curtain

- Basic models with limited options for additional value on simple applications
- Very compact aluminum housing with IP65 polycarbonate enclosure for smaller production machines
- End-to-end sensing (no blind zone)
- Highly visible alignment and diagnostic indicators
- Available in 14 or 24 mm resolutions (detection capability)
- Defined areas of 160, 240 and 320 mm
- 2 m maximum sensing range
- Integral 300 mm M12 QD Pigtail included

RFID Switches

Non-Contact

- Single and cascade models available to protect one or multiple entry points
- Status and performance data from each sensor in a cascade chain is available using In-Series Diagnostics (ISD) and can be accessed with an HMI or similar device
- On-sensor LED indicator provides at-a-glance status information
- Cascade up to 32 sensors in a series using a standard 4-wire cable with M12 connectors, T-adapters, and an end plug
- Tamper resistance to meet the needs of any application with unique, high, and low code models
- Achieves Cat 4, PL e, or SIL CL 3 safety ratings alone or in a cascade chain
- Rugged, IP69 construction withstands exposure to high-pressure, high-temperature washdown
- High tolerance (10 mm) to misalignment enables reliable performance in challenging industrial environments where machine vibration and impact are possible

In-Series Diagnostics (ISD) provides users with status and performance data from each sensor in a cascade chain. The ISD data collected is converted to IO-Link so it can be accessed with an HMI or similar device. Users receive notification when an event has occurred as well as where in the series the event occurred. Events include the opening or closing of a door, door misalignment, wrong actuator, and a number of sensor health attributes.

ISD to IO-Link Module

Access comprehensive diagnostic information for each sensor and for the entire system (string of switches) directly via IO-Link or an IO-Link Master with gateway or via a laptop with USB interface.
- Time and cost savings during commissioning, maintenance and fault investigation
- Protection against unexpected machine stops through pre-fault detection
- Basic information, such as switch safety input and safety output status, can be quickly obtained
- Extended diagnostic information and fault information can also be obtained as needed

Magnetic Switches
Non-Contact

- Cost-effective non contact solution minimizes device wear and tear, even in applications with persistent use
- 3 to 5 mm misalignment tolerance
- A single magnetic pair can achieve up to Category 4/PLe safety rating
- Coded magnets minimize the potential for intentional defeat
- Available in cable or QD models

Hinge Switches
One-Piece Sensor and Actuator with Hinge Function

- Mounts at the axis of a swinging guard where the possibility of misalignment is at its lowest, minimizing the opportunity for nuisance trips
- Achieves Category 4/PLe safety rating with two switches deployed
- Once set, the switch point setting mechanism is fully concealed within the switch, preventing access and complicating any attempts to bypass safety functions
- Available in stainless steel, IP69-rated models that resist high-pressure, high-temperature washdown and similar challenges
- Hinge switches are similar in appearance to standard door hinges, making them completely inconspicuous once installed
- One piece device installs quickly with no need to align the switch and actuator

E-Stop Button
Illuminated 30 mm Mount

- Illumination allows for easy identification of which E-stop has been activated
- Easy installation and no assembly or individual wiring required
- Push-to-stop, twist-to-release or pull-to-release operation per IEC 60947-5-5
- Compliant with ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 Emergency Stop requirements
- Incorporate with OTB/STB optical touch button for a simplified operator station that does not require an additional enclosure.
- “Safe Break Action” ensures NC contacts will open if the contact block is damaged or separated from the actuator
- Internal electronics automatically change the color from the on state to the off state when the button is pressed

WLS15 Series
Low Profile LED Strip Light

- Improves visibility, safety, and efficiency
- 15 mm low profile fits in tight spaces that other lights cannot
- Installs in minutes without impacting existing application framework
- Single-color and dual-color with EZ-STATUS® available
- EZ-STATUS® combines illumination and multiple indication capabilities in a single device

Single-Color Models

<table>
<thead>
<tr>

**WLB32 Series**

LED Light Bar

- Banner’s WLB32 is an ultra-bright LED fixture that features an even light output for a no glare ‘glow’
- Highly energy efficient for overall cost savings
- High/Low/OFF switch
- Daisy chain power to multiple lights
- Metal housing, shatterproof window
- Easy installation with snap clips, or a choice of magnetic or angle brackets

---

### WLB32 Series

**Features:**
- **Family:** WLB32
- **Power:** DC, AC
- **Cascadable:** C
- **Shield:** Blank = No shield, E = Eye shield
- **Control:** PB = Hi/Lo/OFF Switch, M = Motion Switch
- **Connector Plug Type:** Q = Integral Euro QD (dc), QM = AC
- **Lighted Length (mm):** 285, 570, 850, 1130
- **Controlled:** PB, M

---

**Cordsets for DC Models**

- **4-pin Euro-Style**
  - MQDC-415 5 m (15')
  - MQDC-415RA 5 m (15')
- **4-pin Euro-Style QD**
  - MQDEC-403SS 1 m (3')
  - MQDEC-403RS 1 m (3')
- **4-pin Euro-Style QD Splitter**

**Cordsets for AC Models**

- **Double-Ended NEMA 5-15 grounded (IEC Type B)**
  - LQMAC-306B 2 m (6.5')
- **Double-Ended For Cascading Straight/Right-angle**
  - LQMAEC-312SS 3 m (12')

LMBWLB72F
LMBWLB72RAS
WLS28-2 Series
LED Light Strip

- Compact, space-saving design
- Rugged, water-resistant IP69K option
- Available in 8 lengths from 145 mm to 1130 mm
- Lensed models, or choice of clear or diffuse window
- Cascadable models available for connecting multiple lights end-to-end
- Low power consumption less than 9 watts per foot
- Optional snap clips for easy installation and repositioning

TL50 Tower Lights

Preconfigured Tower Lights

- Exceptionally bright, highly visible from a distance
- Install quickly and easily with no assembly required
- Clearly evident on/off status
- Versatile mounting options
- Compact, sleek, rugged design with IP67 models available
- Audible alert: continuous, pulsed and staccato models available

Standard and High-Brightness

- Q = Euro Integral QD (dc only)
- QP = Euro Pigtail QD (Available with Micro Pigtail QD for ac models if 4 segments or less)

QD models require mating cordset

* Positions 6 and 7 not available in high brightness or AC models
* Position 7 not available with audible
### TL50 Pro Tower Lights

**Programmable Tower Lights**

- Up to ten segments (depending on model) for advanced status signaling and high-resolution process details
- Full control of color, flashing, rotation and intensity settings
- Advanced animations like level, timer, counter and action mode provide dynamic visual response
- Parameter and process data options on IO-Link models enable fast and complete control of functionality
- Discrete models are programmable using Banner’s Pro Editor software and Pro Converter Cable

TL70 Tower Lights
Modular Tower Lights

- Light segments have user-selectable solid ON or flashing
- Up to six light segments (six color options) or five segments plus an audible alarm in one device
- Rugged, water-resistant IP65 housing with UV stabilized material
- Bright, uniform indicator segments appear gray when off to eliminate false indication from ambient light

S22 Touch Series
Flush Touch Button

- Large, bright illuminated area for clear visibility of input and touch status
- Flush mount design sits tight against panel, machine and bracket surfaces
- Independent color control or preconfigured models to suit your indication needs
- Momentary versions remain activated as long as touch is present, while latching versions toggle between activated and not activated states on successive touches
- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials
- Rugged, water-resistant IP69K design for washdown environments
- Ergonomically designed to eliminate hand, wrist and arm stresses, requiring no physical pressure to operate and can be actuated with bare hands or work gloves

VE Series
Versatile, Easy-To-Use Smart Cameras

- Available in 5 MP (2592 x 2048 pixels), 2MP (1600 x 1200 pixels), 1.3MP (1280 x 1024 pixels), and WVGA (752 x 480 pixels) models, all with the same powerful inspection capabilities
- Runtime editing capability reduces costly downtime and the software emulator allows for offline building and troubleshooting of applications
- Factory communications (EtherNet/IP™, Modbus/TCP, PROFINET® and RS-232 Serial) for integration on the manufacturing floor
- Two-line, eight-character onboard display provides inspection information and focus number and makes it easy to update sensor settings, facilitating fast product changeover
- Robust metal housing with optional lens covers with or without LED lighting to achieve IP67 rating for use in harsh environments with heat, vibration, or moisture

Select a camera resolution
Choose lens
Optional filters create additional contrast
IP67 lens covers or ring lights available for additional protection

C-Mount lenses, lens covers, ring lights, and bandwidth filters are available on bannerengineering.com

ABR Series
Imager-Based Barcode Readers

- Powerful decoding capability to read even difficult 1D and 2D codes, including DPM and low contrast codes
- Compact metal housing for industrial environments
- Quick configuration with on-board push buttons or a PC using Barcode Manager to solve the most difficult barcode reading applications
- Integrated LED lighting and easy focus adjustment in one package for maximum application flexibility
- Versatile lens options are available to simplify setup and configuration, including autofocus (ABR 7000) which easily adapts to changes in reading distance
- Factory communication options include Ethernet, serial and USB for integration on the manufacturing floor
- Embedded web server interface for monitoring images and statistics over any network

iVu BCR Barcode Reader

Imager-Based Barcode Readers

• Program through an integrated touch screen, remote touch screen or PC interface
• Reads a variety of 1D and 2D barcodes including DataMatrix (ECC 200), Linear Bar Codes, Code 128, Code 39, Codabar, Interleaved 2 of 5, EAN 13, EAN 8, UPC-E, POSTNET, IMB, and Pharmacode
• Ethernet (EtherNet/IP™, Modbus/TCP, and PROFINET®) and Serial RS-232 communications
• Read multiple barcodes in any orientation with one device
• Rugged IP67 housing for factory environments
• Available with a variety of lens and integrated light options – red, blue, green, white, UV or infrared

Accessories shown on page 66
iVu Vision Sensors
Color and Grayscale Vision Sensors

- The iVu and iVu Color Vision Sensors are used to monitor parts for type, size, orientation, shape, location, and color or color variations.
- Configure in minutes using Vision Manager PC software, onboard touchscreen display or using remote touchscreen to access to hard to reach places
- All-in-one solution with camera, controller, lens, and light included in one package
- Inspect multiple features with a wide variety of grayscale or color tools
- Compact, rugged, IP67 housing available with a variety of integrated ring lights including red, blue, green, white, infrared or UV
- Interchangeable lenses, including C-mount, for maximum application flexibility
- Factory communications (EtherNet/IP™, Modbus/TCP, PROFINET®, PCCC and Serial RS-232) for integration on the manufacturing floor
- Ability to change parameters on the fly with full runtime editing to reduce costly downtime

DXM Wireless Controller
Industrial Wireless Controller

- Enables end-to-end IIoT solutions, connecting Banner sensors to Banner’s Connected Data Solutions (CDS) cloud platform
- Integrates Banner’s ISM radio, cellular connectivity, and local I/O
- Program the DXM using action rules and ScriptBasic language, which can execute concurrently
- Log data on the Micro SD card
- Automation protocols include Modbus RTU, Modbus/TCP, and EtherNet/IP for communications with PLC’s, HMI’s, or other local hosts
- Interactive programmable user interface with LCD and LED indicators
- Industry standard RS-485, Ethernet, and USB communication ports
- Easily interfaces with Banner CDS and other cloud service providers

- BWA-AH12106: enclosure
- SX1-LTE-001: Cellular Data Modem Verizon 4G LTE Cat. 1
- SX1-GSM-001: Cellular Data Modem Worldwide HSPA 3G with 2G GSM fallback
Q45 Nodes
for Predictive Maintenance

- To save on installation time, Q45 1-wire serial nodes are pre-configured to work with Banner 1-wire serial sensors. The compact size, integrated lithium batteries, and a variety of compatible sensors make remote monitoring easy.
- The Q45VTP is designed to pair with the QM30VT1 Vibration and Temperature sensor. Vibration characteristics and sample intervals can be set using DIP switches.
- The Q45TH connects directly to the M12FTH4Q temperature and humidity sensor. Sample rates can be set using DIP switches.
- The Q45U is a universal 1-wire serial node that reads any Banner 1-wire serial sensor and determines an efficient power setting.

QM30VT Series
Vibration and Temperature Sensor

- Avoid machine failures and delays by detecting problems early
- Provides high accuracy vibration and temperature measurements
- Dual-axis vibration detection up to 4 KHz bandwidth
- Manufactured with a sealed aluminum housing
- Reduces labor costs by obviating manual checks and eliminating error

Pressure Sensor Node
All-in-One Performance Series Node

- Combines a media isolated pressure sensor, a Performance Series wireless node, and a battery power supply
- Compact, one-piece design simplifies installation and eliminates the need for ordering multiple components
- Integrates easily in applications where infrastructure, movement, or mobility make wired solutions impractical, ineffective, or cost-prohibitive
- Field-proven, Sure Cross wireless architecture ensures secure, reliable communication between devices
