

TL50 Pro Select Tower Lights

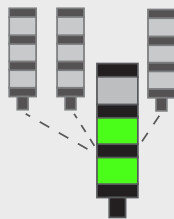

50 mm Programmable Multicolor RGB Tower Lights

TL50 Pro Select is the newest addition to Banner's 50 mm tower light portfolio. These 3- or 4- segment tower lights are rugged, versatile and easy to install. They enable intuitive configuration with the Pro Editor software or IO-Link compatibility. Lighted segments stand out to provide easy-to-see operator guidance and indication of equipment status. For additional annunciation, models are available with an omni-directional audible alarm.

Easy Configuration

Simplify Supply Chain

Advanced Functions

BANNER[®]
more sensors, more solutions

TL50 Pro Select Tower Lights

Intuitive Software with Advanced Capabilities

- TL50 Pro Select tower lights utilize bright, multicolor RGB LEDs that enable customized indication possibilities, including color, flash patterns, and light intensity control
- Pro Editor compatible models utilize an intuitive software interface to enable hundreds of unique colors and wiring variations, for control via discrete inputs
- Pro Editor software users can access up to fourteen different colors and unique animations that attract attention and effectively communicate status

Pro Editor with Pro ID

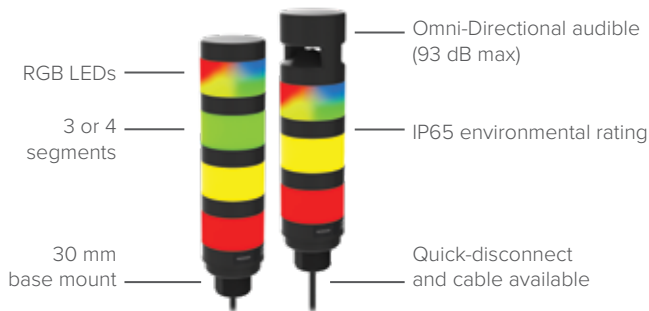

- The Pro ID from Pro Editor allows for universal identification, device labeling, easier tracking, and simple replacement all from a short list of readily available models
- Easily clarify tower light variations by creating unique identifiers for each device configuration
- Unleash the full power of the versatile TL50 Pro Select with the power of the Pro ID and Pro Editor

Dynamic Communication for Seamless Control

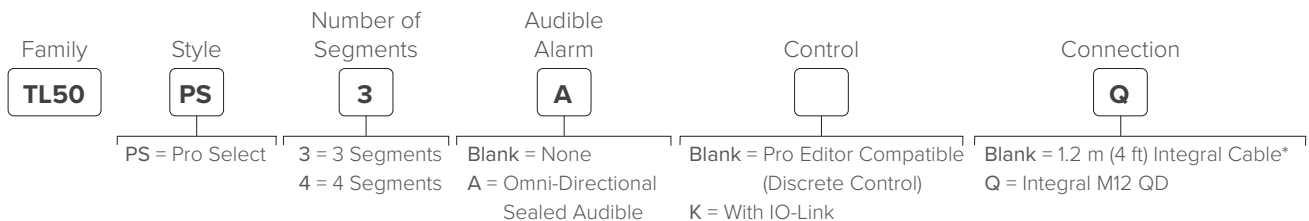

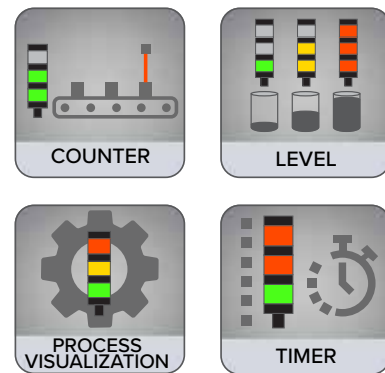

- IO-Link models allow for dynamic control—reacting to commands from an IO-Link master—and have additional capabilities that discrete units do not
- Change device parameters from the control system as needed, such as during product changeover, which reduces downtime and allows machines to accommodate greater product diversity
- Access unique LED color control to provide advanced users with total control
