PRESS RELEASE

BANNER ENGINEERING'S TLF100 PRO FLUSH MOUNT TOWER LIGHT PROVIDES SUPERIOR VISUAL AND AUDIBLE INDICATION

- *Tower light delivers 14 customized indication possibilities and unique animations*
- *Select variations feature customization of 12 unique audible tones for limitless control of audible capability*

MINNEAPOLIS — Industrial automation manufacturer, [Banner Engineering](#), today introduced two new programmable tower light models that provide users with superior indication, advanced animations, and numerous audible options.

The TLF100 Pro with Pro Editor or IO-Link uses bright, multicolor RGB LEDs that enable customized indication possibilities, including color, flash, audible tones, and light intensity. From simple to complex indication requirements, the vast color and animation capabilities offered by these tower lights provide users with an almost limitless range of display options to communicate almost any condition.

Daylight Visible models provide intense levels of light output for areas with high ambient light, including outdoors. Facilities can use Banner Engineering's free Pro Editor software suite to change device functions such as wiring inputs, intensity control, and unique animations. Additionally, both device types offer advanced functions to convey time, count, or level and distance information, which can promote safe and efficient operations in a user's visual factory.

Select variations of the TLF100 Pro come equipped with a configurable, multitone sealed audible alarm. With Pro Editor, choose from 12 unique audible tones and three levels of audible intensity. With IO-Link, customization of tones allows for limitless control of audible capability, including frequencies, patterns, and intensities.

Banner Engineering manufactures industrial automation products that include sensors, LED lights and indicators, machine safety components, and industrial wireless devices. These products help produce the cars we drive, the food we eat, the medicine we take, and many of the things we touch every day. Headquartered in Minneapolis since 1966, Banner is an industry leader with more than 10,000 active products, operations on six continents, and over 5,500 employees, factory and field representatives, and application engineers. Every 3.5 seconds a Banner product is installed somewhere in the world. Online at: www.BannerEngineering.com
