# K100 Programmable Display Beacon

Indicate and Inform at Every Angle

- Improve awareness across a full 360-degrees with bright white alphanumeric display and dynamic color indication combined in a single rugged device
- Easily configure color, messages, and display behavior in discrete models with free software, or take full control via protocol with IO-Link and Modbus models
- Convey more detail with up to 32 scrolling alphanumeric characters legible from 10 meters
- Enhance visibility and status recognition with 14 distinct, configurable color options
- Make critical messages unmistakable with optional audible alerts that capture attention in noisy environments
- Integrate seamlessly into any system with discrete, IO-Link, and Modbus models

PRO-KIT
A single Pro-Kit provides
everything you need to configure
text, light color, and audible
alerts on the discrete K100
Programmable Display Beacon.

Banner's Pro Editor Software
is a free application-based interface
that makes it easy to configure a
device for a wide range of applications.
The software allows users to program
device status, colors, animations, and
much more for control via discrete
inputs, bringing intuitive indication and
interaction to the visual factory.
