

QM26-2 Washdown Sensors

Flexibility That Solves Tough Washdown Detection Challenges

- 316L stainless steel construction rated IP67, IP68, and IP69K is ECOLAB® certified to withstand demanding washdown and chemical-cleaning environments
- Multiple sensing options are available including opposed, clear-object retroreflective, and laser models, providing sensing flexibility for challenging applications
- IO-Link® simplifies sensor configuration and provides access to sensor data
- Complementary push/pull outputs streamline wiring and installation
- 3 mm mounting holes on 25.4 mm spacing simplify installation, streamlining both new machine builds and equipment retrofits
- Operating temperature range of -40 °C to +60 °C permits deployment across a broad range of applications
